

This is a digital copy of a book that was preserved for generations on library shelves before it was carefully scanned by Google as part of a project to make the world's books discoverable online.

It has survived long enough for the copyright to expire and the book to enter the public domain. A public domain book is one that was never subject to copyright or whose legal copyright term has expired. Whether a book is in the public domain may vary country to country. Public domain books are our gateways to the past, representing a wealth of history, culture and knowledge that's often difficult to discover.

Marks, notations and other marginalia present in the original volume will appear in this file - a reminder of this book's long journey from the publisher to a library and finally to you.

Usage guidelines

Google is proud to partner with libraries to digitize public domain materials and make them widely accessible. Public domain books belong to the public and we are merely their custodians. Nevertheless, this work is expensive, so in order to keep providing this resource, we have taken steps to prevent abuse by commercial parties, including placing technical restrictions on automated querying.

We also ask that you:

- + *Make non-commercial use of the files* We designed Google Book Search for use by individuals, and we request that you use these files for personal, non-commercial purposes.
- + *Refrain from automated querying* Do not send automated queries of any sort to Google's system: If you are conducting research on machine translation, optical character recognition or other areas where access to a large amount of text is helpful, please contact us. We encourage the use of public domain materials for these purposes and may be able to help.
- + *Maintain attribution* The Google "watermark" you see on each file is essential for informing people about this project and helping them find additional materials through Google Book Search. Please do not remove it.
- + *Keep it legal* Whatever your use, remember that you are responsible for ensuring that what you are doing is legal. Do not assume that just because we believe a book is in the public domain for users in the United States, that the work is also in the public domain for users in other countries. Whether a book is still in copyright varies from country to country, and we can't offer guidance on whether any specific use of any specific book is allowed. Please do not assume that a book's appearance in Google Book Search means it can be used in any manner anywhere in the world. Copyright infringement liability can be quite severe.

About Google Book Search

Google's mission is to organize the world's information and to make it universally accessible and useful. Google Book Search helps readers discover the world's books while helping authors and publishers reach new audiences. CITIZENS OF DETROIT :—You are again presented with a New Directory, which it is hoped will subserve the general convenience of the local, the State, and the large travelling community from abroad, who especially during the Summer and Autumn visit our pleasant city, and who travel for pleasure, if not on business, to the romantic regions of the upper peninsula. Notwithstanding the present and recently passed troubles, which have to a great extent operated as impediments to the social intercommunication of the several States of the Confederacy, it is to be expected that on re-established relations of comity, and admitted fellow citizenship, with the people of the extreme Southern States, an interchange of travel, and general reciprocity of the kindly amenities of American citizenship will follow a restoration to old style usages, which seem intended to be "the order of the day." In fact this national family estrangement cannot be maintained very long without damaging the true interests of all sections of the United States. *The people*, of the several States will not allow the Union to be rent asunder, and therefore all objectionable and fanatical legislation or party pragmatical interference with the vested rights of certain portions of our common country, by which national civil strife might be engendered, and the stability of this great National Republic endangered, will not be regarded with approbation by the masses of the community. When a good understanding is happily restored, no doubt a large number of Southerners with their families and servants will come up during the summer and autumn to enjoy the delightful freshness of our Northern climate in those seasons, and they may rely on every courtesy being extended towards them. Fanaticism in fact in all parts of our beloved Union should not longer be permitted to impede the fraternal hospitalities that ought to prevail between American Citizens of all sections of the Union. "A HOUSE DIVIDED AGAINST ITSELF CANNOT STAND!"

In the preparation of this Directory every dwelling and place of business within the limits of our extensive municipality have been visited, and a most reliable record taken of every adult residents name, occupation and address; and the work has been in perpetual revision up to the hour of going to Press.

Persons unacquainted with the details of compiling and printing a work of this character have, probably, not the most remote idea of the hindrances consequent upon its production with the rapidity the public would desire. With a lever sufficiently long a physical power might be imagined capable of raising the world, and with abundant means to invest, and competent aid to employ, we could engage to issue a Directory of Detroit in three or four weeks. But there are a great many reasons not here necessary to name, why this dispatch is inexpedient. A superior Directory is however now offered for your patronage, and we hope to find it will be acceptable and appreciated.

You can scarcely extend patronage enough towards an undertaking such as this to make the compiler and publisher sufficiently remunerated for the arduous labors involved in the production of a reliable general Directory,—if published at proximate periods particularly. In such Cities as New York the experience is quite different. During the compilation, printing and binding of the Directory of the Great Gotham, there are employed day and night from 200 to 250 individuals, all at allotted tasks for about eight or ten weeks. In New York probably 10,000 idle clerical hands could be brought together to discharge a few weeks' labor, who would then be consigned to the former condition of "waiting for something

to turn up." Then, too, there is a certainty that a large edition will be sold, which also enables the publisher to cheapen the price of the work. When Mr. Trow's Directory was so unfortunate as to get burned up, a few years ago, he was insured for \$40,000, so said the newspapers, from which circumstance a fair idea of the extent of his business might be imagined. In our Western Cities, on the other hand, while Directories are admitted to be indispensable, yet one half the ordinary list of subscribers will not incur the expense of producing an annual edition. During 14 weeks the compiler has not been able to retire to rest earlier than midnight, and frequently not until after one o'clock.

His visit of record to every family should be regarded as an ordinary year's labor. The subsequent alphabetical arrangement of the names, and preparation of other matter for the press, may be adjudged as another. The reading of proof, and revision of the entire work. *line upon line—letter after letter*, should be labor enough for another. The unremitting industry necessary to provide paying support for the work, by the collection of advertisements; the writing of letters; calling upon parties requesting attendance; and the labor in the distribution and collections, for the work, may in justice be pronounced another year's labor. In addition to all this labor, which the compiler personally discharged, a variety of impeding annoyances have been met, encountered and overcome, affording upon the whole, evidence satisfactory to himself, that Directory publishing is not a very paying nor pleasing employment. This is the Fifth Directory we have prepared for the City of Detroit since 1858. If it be not the last, which is more than probable, we would suggest that local philanthropy should prompt its wealthier property owners to subscribe in advance for the preparation and publication of the next, unless the Government of the City should undertake to produce authoritatively an annual Directory and Registry of the City population, at the expense of the Treasury, which is the course we are prompted by a sense of duty towards both the publisher and the public to recommend.

We close these observations by remarking, that to any person who wants the work in any form of business, there is nothing locally more cheaply useful than this Directory at \$2,50. Hoping that this sum will be cheerfully, liberally and promptly paid, and that the entire edition will be exhausted in the generous paying patronage of the community.

We remain, very respectfully,

JAMES DALE JOHNSTON.

Collection Notice.

It is requested that no Moneys be paid on account of the Directory, or in payment for advertisements, except Receipts signed by the Publisher be presented.

Statistics of the Growth of the Population of Detroit.

Compiled from the Enumeration, taken from time to time by the Publisher of the City Directory :

1880	2,222	1855	52,000
1840	9,102	1856	65,000
1850	21,057	1857	70,000
1853	84,436	1859	82,000
1854	40,127	1861	No census taken by the Compiler.

Regarding the operations of the State Homestead Law which offers 80 acres of State Government Lands as a free Home to every settler upon them, under the most reasonable conditions of improvement, as well as the advantages offered to enterprising men, without much means to obtain any desirable quantity of Lands, the property of the Federal Government, on the merely nominal terms of the Graduated Land Laws of the United States, it is but reasonable that very many families from time to time have left Detroit to settle on farms. Several of our newly organized Northern Counties have been comparatively well settled by population thus attracted from cities and villages. This more than suppositious view of the city population might determine many, reasonably enough, to imagine that there are not as many inhabitants in the city as there were in 1859; but taking also into view the natural increase [and it may be here admitted that Detroit is a city very prolific of a multitudinous, bright eyed, rosy cheeked, long nosed population of Juveniles],—as well also the fact that many ill-stared, illy-instructed and not remarkably industrious *farmers* return to the cities again, having failed in finding hoped for success and enjoyment at the plough. There need be little doubt that an *industrious enumeration* of the city, conducted *scientifically, intelligently* and *thoroughly*, would produce **EIGHTY-FIVE THOUSAND** inhabitants of all kinds, grades and colors. The labor is so great however, that it is enough to scare away from its performance any half-dozen ordinary office holding, or office seeking individuals, who might desire to obtain the pay of the Common Council for the work, provided it were allowed to be executed superficially or speculatively. In the preparation of this Directory, the Compiler has been to every family, and to many families *three or four times*, and a man who will have discharged a duty of this *Titanic* labor over a city so expansive as is Detroit, compared with her population, ought to be accorded a competency of forming a reasonable number of correct ideas in relation to his work in hand.

The reader is respectfully referred for further interesting Statistical particulars, to the following summary extracted from the always masterly annual report of Robert E. Roberts, Esq., Secretary, of the Detroit Board Water Works.

On application to Mr. Roberts, it is presumed that any stranger would be cheerfully presented by him with a copy of the valuable Report here alluded to, of the condition of the Water Works Department, the management of which in all the details reflects the highest credit on the Commissioners, and their appointed officers.

Frederick A. Stokes, Merchant.

This Gentleman, as successor in the already widely known Wholesale Grocery Trade of Hon. N. P. Jacobs, corner Jefferson avenue and Wayne Sts, generously initiates our Advertising Department. We are indebted to him for many favors, which we should be glad effectively to reciprocate. We have however discovered that although comparatively a young man, Mr. Stokes is an old Wine Merchant, and heavy importer, and has stocks of old Vintages, both of superior flavored Wines and Brandies, wich never decay by age. Mrs. S. withal though we met him a Church going, is a very cheerful companionable gentleman.

The Detroit Directory. Johnston's.

We should write a special recommendatory notice of our Johnston's Detroit General Directory, but that we are not paid for doing so, and therefore request everybody to examine for himself, as a committee of one. He must certainly report favorably, and will move himself and everybody else to extend to us an expected generous patronage. Assist us at least to be promptly paid, for our labors have been Herculean and unmeriting, and only very remotely known to, or imagined by any except the Maker of the People! There are a few Hundreds of Dollars of bad debts on former editions, and we should be as good-naturedly, willing as ever to receive from the defaulters payment on old accounts, and open a new leaf.

Ship Building.

We observe a very stately Brig on page 68, telling everybody pretty plainly to come up and look at it. See advertisements of Messrs. Campbell & Owen.

Lumber Merchants.

Many changes have occurred in Firms at the West End. The Messrs. Brooks & Adams and N. W. Brooks are annually enlarging their business. Large quantities of pine lumber pass from their yards to the interior of the State by the Michigan Central R. R. which as also the Grand Trunk passes through one of their yards. See page 68. On page 64 will be noticed the card of our always constant friend Henry E. Benson, Esq., whose lumbering operations are very extensive. Mr. Benson's yard is located above the Round House, on Atwater Street East.

Cutlery,

The Factory of Mr. Samuel Shaw at 100 Woodbridge St. East, deserves special notice. Parties suffering from Hernia [the Doctors should all know] should obtain safe and reliable Trusses from him.

Detroit Locomotive Works.

This Establishment should be in full blast in the manufacture of our Locomotives. The maintainance of a few large Western Establishments, should be regarded as a discreet and beneficial policy, on the part of Railway Managers and Capitalists.

United States Type Foundry. James Connor & Sons, N. Y.

Since the advertisement of this House on page 65 was put in Type the Firm moved to their splendid new six storied establishment at Nos. 28, 30 and 32 Centre Street.

This establishment is *Nonpariel* in its line of business, but as printers will discover something better betimes than *Nonpariel*, we had better close this notice by certifying upon our honor that we have played "*hard noses*," with the type of James Connor & Sons, and the type of other Founders and have always found the face of other type battered, while the type of James Connor & Sons was in no instance defaced in the least degree.

Franklin Type and Stereotype Foundry, Cincinnati, Ohio.

We have not played "*hard noses*" with the Founts of this House, which is a branch, we are informed, of the celebrated Type Foundry of L. Johnson & Co, of Philadelphia. A large number of the beautiful Stereotype Cuts we have used in this Directory are from the Cincinnati Foundry, where Mr. R. Allison is the Superintendent. See page 66.

Doctor J. W. Kermott.

This highly esteemed medical gentleman has been establishing a new Dispensary at 179 Woodward avenue. Refer to page 67.

Farrand & Sheley.

DRUGS, DRUGS,—GROCERIES,—PAINTS, OILS, GLASS, &c.

Now there is no use in attempting to puff this old Established House, for verily we should be expected to be read out of good society, upon a vote of these very men themselves for exaggerating their own praise as able Merchants and honest men, so, we had better not *burn our fingers*, in doing more than inviting every Retailer in Michigan to call on Deacons Farrand & Sheley at 80 Woodward avenue. [See card page 67 and at page 817,] where they will also be found authorized by the Common Council to sell pure liquors for Medical purposes; and we would say he is a fool who would drink them for any other purpose.

Flagging! Flagging!! Flagging!!!

Not a bit of it! Just as lusty as ever we were! It is only an affair of the splendid appearance of our Detroit City Streets, since William Holloway introduced his fine Flags from his Medina Quarries some two years ago. The Establishment is now Holloway & Co., [Mr. Charles H. Irvin being the Associate.] It is, seriously, a wise policy for every property owner to have these flags laid, whether in the thoroughfares or in the remoter Streets and avenues, and we trust the Common Council who are the men elected by the people for their sagacity, good common sense and business abilities generally, will fulminate the local law against those shabby and wealthy miserables, who never desire to improve the City which nursed them into importance. An example is presented to them in the splendid walk that is laid fronting the entire block on which Gen. Cass's residence is located on Fort Street, and in numerous other localities, as at Senator Chandler's and Mrs. C. Jones's, Mr. Duncan's, &c. This Firm deserves great respect indeed for its enterprise in inaugurating this improvement which gives proof of the economy and utility of superceding the old style plank walks.

Morhous & Dewey. Doors, Sash and Blinds.

Gentlemen, look for your card on page 69. How do you like it? How do you like us?

William Shultheis, Marble Manufacturer.

Friend! We have erected a monument on page 69. Improve the time for the days are evil.

A. H. Smith,---Ink and Cement,---page 70.

This is a Detroit Manufacturer of Ink, upon an extensive scale. He has exhibited us certificates of its superiority from the City Clerk, who uses it for the Records of the Municipality—and from several of the leading Business Firms in Law and Commerce, and having shed torrents of Ink ourself in twenty six years, no one would be warranted to doubt our competency. It has no sediment, a very jet and freely flowing fluid, well worthy of general adoption. It is preferred by judges to all other inks in the Market. It is locally due to Mr. Smith that all dealers in the article should make their purchases of A. H. Smith 166 Clifford Street. This Ink obtained Diploma at Michigan State Fair.

Captain Scott---Ships.

Special attention is requested to Captain Scott's circular on page 70. Let our Wooden

Walls be appreciated. At the present time we require an increase in both the Army and Navy.

J. and J. S. Rankin.

Exclusive Brass Founders, corner Third and Congress Sts. If local encouragement were sufficiently extended to these worthy practical founders, useless "Triangular Gongs" need not be imported from England, nor Bells from Troy. See page 70.

Charles Busch, 201 Jefferson Avenue.

Mr. Busch is one of the men who properly belong to civilized mankind. Being however, an importation from "Faderland," he will always be found willing and entirely responsible to all who desire to avail his services in German Exchanges. But as a dealer in every variety of HARDWARE, MECHANICS TOOLS, STOVES, GRATES, COPPER AND TIN WARE, &c, &c. He is prepared to do a very extensive City and State trade. He has the exclusive sale of a number of superior patent articles, for which see his advertisements on pages 71 and 818.

Our Furniture Manufacturers and Dealers.

Special attention is requested to the Advertisers' Index, and from there to the Advertisements of the Manufacturers and Dealers. To present any adequate idea of the wealth invested in this Department of Trade is out of the question. The magnificent Ware-Rooms must be visited. There can be no appreciable home civilization and happiness without suitable furniture. In these establishments are to be found plain and elegant articles in endless variety. We would say, that if aiding the publication of a local Directory, to facilitate the general public be an evidence of the absence of smallness of soul, their customers will be glad to form and improve acquaintance with those gentleman.

Our Dry Goods' Importers, Jobbers and Dealers.

A list of names engaged in this all important Trade, will be noticed on reference to the ADVERTISERS' INDEX [which it should be remembered is a compartment of the General Directory of Cities, that exclusively belongs to advertisers, who aid the production of this to the general public, indispensably useful Work]. Those gentlemen are all old familiar names of great popularity, men thoroughly acquainted with the science of the trade, and who have promptly in the Market for the City and State Wholesale and Retail Trade, every variety, in beauty of style and pattern ingenious manufacturers produce. They are all Wholesale as well as Wholesaled dealers, and except for the sake of visiting Gotham and incurring the agreeable vicissitudes and chance losses and hazards of the journey, any Village dealer can do better we believe by dealing in Detroit than by "Going East."—Refer to the ADVERTISERS' INDEX, page x.

The Newspaper Press.

Fraternal acknowledgements are hereby respectfully and faithfully expressed towards the conductors of such newspapers, throughout Michigan, and in other States from whom our Directory has received a helping hand. We have printed a list of our Friends in the ADVERTISERS' INDEX, and until we have the pleasure of meeting them personally, wish them something more than their professional pleasures.

Veterinary---Sick Horses.

A very skilful Equine Knight of the Lancet is Doctor J. C. Gregory, at 19 Griswold St., near the Capital Union School.—See page 78.

Our Attorneys and Counsellors.

Just think of a Directory Compiler, or even a Peter the Great, Pio Nonno, or Louis Napoleon, *puffing an Attorney!* If we were as honest as Garribaldi, we should admit that we can do without Attorneys no more than we can do without other moralizing instrumentalities. In fact, but for the codification of the general moral sentiment of mankind, in all the relations of life, into forms and axioms of law, by the legal profession, we should be enjoying existence, "a law unto ourselves," beyond the hospitable regions of Kamskadale, where the eye is never disturbed by the light of the Sun. A few of those generous hearted gentlemen have aided the Publication of this Directory, for whose names and addresses please refer to the ADVERTISERS' INDEX.

Justices of The Peace.

See the ADVERTISERS' INDEX for Cards.

An Elephant with Top Boots! See page 75.

Barnum is at last Eclipsed! This Elephantine Bucephalus, seems to enjoy the luxury amazingly of being newly shod—so do Directory Compilers. We must ourselves have worn many pairs of Boots in walking more than seven times the Earth's diameter in discharging Directory duties in the City of Detroit, seldom having nearly so fine a looking pair in our service as C. C. Tyler and Co's, Elephant—No matter! We are not a very jealous fellow. We have gotten rid of selfishness a long time ago. There is some "Gas" and "Fancy" left yet, and any one who wishes to see our Elephant can see it either in the possession of President Lincoln, General Winfield Scott, Major Anderson, or probably yet with *Mr. Jim Buchanan, Esq*, Custos Rotulorum at Wheatland Pa.—and specimens of the same animal at the dazzling Regal Courts of Mr. Louis Napoleon and Mistress Victoria. The "Tyler" Elephant can be seen at 88 Woodward ave, where Boots of every kind, degree, quality, style, finish and gradation of prices for Elephants tall and small, can be had at the very cheapest rates, wholesale in cases and retail in pairs. We ourselves must get measured for a "Tip-top-pair, and we shall then make Elephantine strides for O'Regan.

The Composition Roofers.

These House Roofers have deservedly superseded the shinglers. Two of the latter hum-bugs have defrauded us out of \$20 advertising. One of them used to sell the right of a machine, and the other used to grind the shingles. Let the Composition Roofers beware, or we shall send out one of our Detectives to find out whose "shanty" leaks. Next to slating we know there is nothing more Economical, or safe, as a fire preventive, than PATENT COMPOSITION ROOFS. For advertisements see the Index.

Saddlers and General Horse Clothing.

See the Adams' Express Card, page 76.

Hardware, Wholesale and Retail.

We are not aware that we can do better than call attention of the Public to the group of Merchants in this line whose names will be found in their own INDEX TO ADVERTISEMENTS. How could we particularize everything in a General Hardware Store, *from an Anchor to a Needle!* Refer to and read all the cards, it was for that they were handed in to be printed. Go into the Stores of these gentlemen and note the multitudinous articles, in indescribable variety, with which their establishments are replete, and which they desire to transfer to customers at *low prices*. Their Stocks are all restless to get into the secession movement. But we warn all as fast as they secede, *the Union will recruit.*

Flour and Produce Generally.

We should here particularize our friends, but that "*Flour got very haughty,*" and we shall not pay for it more than commerce would warrant.—See Advertisers' Index.

"Old Cast Off Clothes!" Page 78.

Just think of that, "in the Land of Liberty!" Where nobody dares be *Sans Culotte!* Oh! that we had not allowed the death of that great philosopher, who possessed the secret of turning the paving stones into gold! Read this advertisers' card and send him all your cast-off-clothes *with something in them.* We had supposed the Detroit Ladies' Industrial Society had bought out Captain Crimmins' Business. But this need not be our business.—See the card at page 78.

Undertakers and Coffin Manufacturers.

How can we be anything but serious on so *grave* a subject! We have been obliged to undertake the duty of stating that Mr. Farwell, [a very suitable name for coffin maker and UNDERTAKER] has moved from his old place of business in Union Block Jefferson ave, to a capacious warehouse at 181 Woodward ave, where every variety of burial cases are on hand to suit the approving tastes of both the dying and the dead. We never believed that any one was dead,—really dead, but "*the dead in trespasses and sins*" from which condition of death they are freely offered translation into "*newness of life,*"—everlasting, pleasant, happy, holy, pure life, by Him who is the avenue of approach to the Creator—the right hand man of the eternal and incomprehensible, unseen being, familiarly called God.—Jesus Christ, our resurrected brother, who clothed himself as it were with our nature by the supreme power of God out of the ordinary course of procreation. This is what the good man Paul, who was a cotemporary of Jesus, described as God manifest in the flesh, that an example of the highest manly purity should be constantly presented to us in the history of his life, sealing his title to being our

Representative and Head, our Deliverer, Saviour, Captain, and Chief, and, Mr Farwell, one word for all, *In Him we only fall asleep* to awake up to the enjoyment of purer delights in the Better Land. Who can comprehend it? Who dares to doubt it? "This is Eternal Life! To know the only true God and Jesus Christ, whom He hath sent." This is a very cheerful and pleasing belief. Hope Mr. Farwell, the evil intelligence, whose power is so much seen every where, may not close our hearts in absurd infidelity. People may call these ideas the *forseeable* results of specific education, and so they are admitted to be, but happy are those who are favored with the education of the light in the Soul that comes from the Source of light and beneficence. But the resurrection is taught by the seasons! Except a berry of corn or wheat fall into the ground and die, it does not germinate its new life, but who ever supposed that a man was a grain of wheat or a mushroom—without a soul—an eternal ethereal intelligence? Such belief would be very stupid indeed! Who can cheerfully believe in annihilation? Away with every "Tomfoolery" about religion, Mr. Farwell, but accept the simple faith of Jesus. GABRIELDI cannot injure it, and Paganism is beyond its pale.—"GREAT IS THE MYSTERY OF GODLINESS!"—Refer to Index.

The Rolling Mills.

What are they? Shall we confess the public ignorance? Are they Political grinding machines? No, Reader! They are Mills at which all kinds of Bar and Rod Iron are manufactured for blacksmiths, engine builders &c, and they also make T Rails for Railway Tracks. The Wyandotte Mills, situated at Wyandotte a few miles below Detroit, are owned by a company of Detroit Stockholders, and the office whose affairs are conducted by WM. H. ZABRISKIE Esq., is located at the Store of the Company, foot of Woodward avenue, in the same office with CAPTAIN E. B. WARD, who stands deservedly in the front rank of the prosperous pioneers and founders of the State of Michigan. Another similar mill is located at Chicago, in which Detroit Capital is also largely represented, and these mills are capable with proper Federal protection to discharge all the Railroad and Iron-mongering wants of this whole Western Region including an area of several States. We can be pardoned for importing Iron wares from Pennsylvania, with our own iron mountains & mines undeveloped, what is it but the most ridiculous folly to keep on sending our Capital which is the life blood of every local industry over the Ocean, 8 or 4000 miles, for an article inferior in every respect to our Lake Superior Iron, which is also manufactured into extensive blooms, and we believe in Merchant Iron, also by the Lake Superior Iron Company, the office of which is on the dock, foot of Woodward avenue, at the office of DOCTOR RUSSELL, and its affairs managed by ALLEN A. RABINEAU, Esq., who is Secretary and Treasurer to the Stockholders. We enter a protest against *our money*, which is so badly needed for the pay of our Mechanics being sent out of our Country for either Pig or Wrought Iron. We vote for an Independent State Sovereignty against all the World. OUR MONEY AT HOME, AND EVERY DIME IN CIRCULATION!

Agricultural Implements, Warehouse.

Our never failing friend, W. S. PENFIELD—card page 81. Still conducts the agency of this old Established House.—Refer to his Advertisement in Index.

Land and Lot Agencies.

It is absurd for men to expect knowledge to creep into their craniums without "searching for it as for hidden treasures." Therefore to expect that the valuable information contained in the advertising department of the Directory shall be known to every body by mere intuition, is so foolish that we warn our readers to keep a sharp look out. We therefore refer the reader to the card of Doctor J. L. Whiting on page 81, and to the Advertisers' Index, where *all the Agents and Dealers* in Lots and Lands will be found conspicuously displayed.

We ourselves give away, and sell the most delightful lands in Emmett County, Iowa, forty acres of delightfully wooded, lawn and meadow lands in this County are offered freely for anybodys acceptance, and more, their Houses and Lots in Detroit, or in any of the Cities and Villages of Michigan, will be bought at fair prices and one third cash paid down, to enable them to move independently upon ESTATES of their own, where with a few years diligence the possessors and their families will be for life independent and comfortable. The Proprietors are anxious to settle the County of Emmett, and every kind of encouragement will be given to settlers. When a few families get ready to go they had better call on James Dale Johnston, 142 Cherry Street, Agent, who will arrange every matter for them satisfactorily.

The Plumbers.

Please refer to THE INDEX! We know of a man who caught a Lizzard in his water pipe. We ourself have had an extensive experience in Hydrostatics.

Jewelry and Fine Watches.

Will the reader please turn to page 82, post himself properly, and if he is in pursuit of what is reliable and worth his money, just take himself and his money to the advertisers establishment at 55 Woodward avenue. His name cannot well be forgotten.

Dining Saloons.

See ADVERTISERS' INDEX. The places advertised are very accommodating to get a Dinner or Lunch for the wayfaring man. People who will not buy a Directory go to Carsons for information.

The Breweries.

We have partaken of a great many things in our short life time, but never dined, as we know, on Chinese harrier, or rat soup, and we have every where in the world we have lived, been permitted to drink almost anything we pleased under the government of right, reason, and good common sense, on old fashioned Temperance principles, but it has been reserved for us to experience the arbitrary, and as appears to us very inconsistent dietary prescribed by the Michigan Legislature of 1860-61, which solemnly enacted a Law that whenever our physician instructed us to take some Beer or Ale as a Stomachic Tonic, we must call for and swallow off FIVE GALLONS of this kind of stuff at a time. Strictly conservative of moral and law abiding habits, we recently had occasion to take a goblet of ale at one of our well conducted Taverns, and having called for our five gallons, took one cup and requested the House Keeper to put by the balance for our future use. It put us in remembrance of the truism of the great Dan O'Connell, who had got the peculiar faculty of setting at fault the British Law Makers, when he used to boast to the *finest peasantry in the world*, that, "The English Parliament never made a Law that he could not drive a coach and six through." Set before the people the "friction" theories of "good and evil," and leave the rest to the good and the evil influencing powers, and to the constituted police. The faces of men in daily intercourse with each other, show how they live if there were no other index to their habits; and the intemperate and vicious are invariably chastised by their own unrestrained indulgences. But he is not wisely informed in his code of family dietary who will not order a barrel of Ale to his cellar for family use. The Brewers who make good healthful present use and Stock Ales will be found under the head of "*Brewers*," in the ADVERTISERS' INDEX, which see.

Freights and Forwarding.

We are at present impressed with the idea that John Hutchings & Co., foot of Griswold Street, on the Dock, have the facilities of transporting all mankind, their wives and children, and any quantity of Seceding States to the Iron, Copper, Gold, and Silver diggings of Lake Superior, and back again, if they so desire, as the several Lines of Propellers and Steamers they manage the business of, run in both directions. The advertisement of the company tells much more than we can afford to re-print, being ourself in a condition of transitu, and being at the end of a page we have only space to say—Refer to page 84.

Butchers.

We have a pointed prejudice to deal with any Butcher who offers lean meats in the Market. The dream of Pharaohs Lean Cows is ever present to our minds. If an inferior Butcher were to pay us double for an advertisement we could not think of accepting his offer. Everybody in the Street pulls us by the button to know, "how we look so well?" and we refer him forthwith to "our Butchers and Victualers" in the Directory. Our face is not the only index to the best Meat Markets. A very correct guide is to be found in the ADVERTISERS' INDEX.

The Hatters and Fur Dealers.

Please turn to the Advertisers' Index. The style of hat we generally wear is viewed in the same camera, obscure as Horace Greeley's pantaloons!

Portraits, Picture Frames and Artists Generally.

The Gentlemen engaged in these ennobling kinds of business have been mindful of the public convenience, and their cards stand out in bold relieve in the Directory. May their shadows never grow less. They are the embodiment of "The living presentiment."—See the INDEX.

Tobaccos and Cigars.

See ADVERTISERS' INDEX,—and—and—President Lincoln's Inaugural!

Show Cases.

See page 91. Call at 27 Jefferson Avenue.

Clothiers.

THE ADVERTISEMENTS to which references may be had from the ADVERTISERS INDEX, represent very important heavy Houses.

Flour Inspectors.

The office of Mr. Joseph Hatch the official Inspector is at 186 Woodward avenue. See page 92 for his card.

Slates---Tiles.

For samples see the Vegetable Market at City Hall, and the office of the advertiser, corner of Randolph and Atwater Streets. This is a very desirable branch of industry but recently established, and we promise the advertisers E. W. Ladd & Co., the next fine house we build in Detroit shall be slated. See page 98.

Detroit Plaster Mill.

This Mill, Mr. J. B. Hinchman Proprietor, is adjoining the Detroit and Milwaukie Rail Road Depot.—See page 93.

A Review of the Commerce of Detroit for the Year 1860.

Reported to the Board of Trade by RAY HADDOCK, Esq., Secretary.

This is an Annual Review of the Trade, Commerce and Manufacturers of Detroit and incidentally of the State of Michigan and its elaborated aggregations in the extensive field of general industry throughout the State, show plainly, on examination, how assiduously the able Compiler prosecuted his researches in acquiring the data from which the 47 pages of his pamphlet are produced. The Compiler of such a work deserves the enjoyment of the unmistakable esteem of the general public of both Detroit and the State of Michigan. Ten thousand copies of this work ought to be sold in the City of Detroit alone. Twenty thousand throughout the State, and the Common Council, and Board of Trade should take decided interest in the extensive distribution of a Pamphlet of such importance to the many departments of the general Industry of Michigan, which are placed before the public at large in such methodised form of detail and summary as must greatly facilitate every individual whether engaged in private or public pursuits, who take an interest in the progress of the Country.

It is deplorable that our hard working men of the Corps Editorial, like Mr. Haddock are not more *substantially* rewarded from the Common Bank of Public Gratitude. Days of arduous toil and Nights, "Nights, past the Midnight," have been without doubt spent on this to everybodys useful compendium of our State Resources. card inside front cover, and also on Mr. Julius Movius' General Agent's card for Buffalo office on page 289.

SHELDON, SMITH & SON.

These able architects have succeeded to obtain the general approbation for styles of architecture employed in several new and beautiful blocks of business and public buildings during the past season. We understand their classic designs of the Detroit workhouse, now finishing, have given great satisfaction both to the builders as well as to the public. Refer to advertisement on page 290. See article headed THE WORKHOUSE.

DETROIT CITY FOUNDRY.

This extensive establishment, foot of Randolph, is, as usual, presided over by Mr. J. B. Wilson, the proprietor, who drives business with an energy and accuracy that makes engagements with him very satisfactory. Refer to advertisement on page 290.

CROCKERY, CHINA, GLASSWARE.

Messrs. Lewis & Moses' advertisement will be found on page 291, and merchants are supplied at wholesale Eastern prices from their warehouse at 221 Jefferson Ave.

GOOD ADVICE TO LADIES.

Refer to page 291. Please read slowly and solemnly, and without tittering!

HARRIS & NASH.

Refer for advertisement to page 292.

THE UNIVERSITY OF MICHIGAN.

The Detroit and Michigan community generally, have been much edified by the perusal through the city newspapers, from time to time, of the highly interesting proceedings of the University at Ann Arbor, as reported by Mr. James Henry Goodsell, of the University, who specially reports for the Detroit Daily Tribune.

F. BUHL AND COMPANY, MANUFACTURERS OF HATS, FURS, &c.

The partnership of Messrs. Buhl & Jelly recently dissolved, and reconstructed by associating H. A. Rowland, Esq.

L. F. HARTER & CO.

These gentlemen have moved to 154 Woodward avenue—short distance on the right hand side above the Campus Martius. They will not be long at 154 until the connoisseurs in the art of tea making will be attracted by their olfactories to the place "as smells of good T." A gentleman in disguise once called at this establishment, but not having a long Roman nose, absolutely selected an inferior article, and would have no other, because it was cheap. Who ever heard of cheap gold? The most delicious Teas and Coffees are sold at this house. Griffith is always at his post, expertly ready to wait on his many friends.

Detroit Marble Mantle Works. G. & A. F. Mehling.

This is a branch of art and manufacture but recently established in Detroit. The process of giving a real tangible appearance of plain and variagated Marble to Wood, Iron and Stone is successfully demonstrated at these works. Every intelligent citizen ought to make a visit to the establishment which is destined to obtain an extensive patronage.—See p 86.

A. LEHMAN, MERCHANT CLOTHIER, 34 Woodward avenue, near Woodbridge St.

We request reference to Advertisers' card on page 91.

M. COHEN, MERCHANT CLOTHIER, Masonic Hall, Jefferson avenue.

Mr. Cohen having moved from Woodward avenue to the above address at Jefferson avenue, attention of the public and his numerous customers is requested to his Advertisement at page 386.

T. H. ARMSTRONG,—HATTER AND FURRIER.

Having announced his intended removal to No. 176 Jefferson avenue, we wish the public apprised of this fact in requesting attention to his card on page 93.

NURSERYMEN.

Refer to the ADVERTISERS' INDEX,—for Gardens and Nurseries Advertised.

TOBACCONISTS.

The public will please refer to the ADVERTISERS' INDEX.

PETROLEUM.

During fourteen weeks the Compiler of this Directory has written by this Light, purchased at the Store of Arthur Burtis, 135 Jefferson avenue, between the hours of six o'clock and midnight, and has always found it a Light of superior brilliancy, and well worthy the general public patronage. Quite an equivalent to Gas Light.

D. W. GLENDINNING, 154 Michigan avenue, West.

Attention is requested to the card of this very enterprising Founder, Iron Stair and Fence Builder, to be found on page 96. His references, would sustain any man's character in the community. Mr. Glendinning discharged a large amount of work during the past active building season. Success invariably attends men of diligent habits of business.

DECORATIVE PLASTER & STUCCO WORK.

James Boyd & Co., 149 Adams avenue, East.—See Advertisement page 96.

BURNHAMS' GREAT WARDROBE.

A. Burnham & Co. This is quite a Metropolitan and extensive Clothing Establishment, where gentlemen may obtain a superior outfit, and, we are assured, at reasonable prices. Boys' Clothing in neat styles and great variety are also obtainable at BURNHAM'S GREAT WARDROBE. The number is 183 Jefferson avenue, and Messrs, Burnham & Manchester are desirous that we should not confound them or their Establishment with any other persons of the same name and business elsewhere—a request cheerfully complied with, for we know them to be wholesouled business gentlemen.—Refer to their card, at page 97.

PINE TIMBERED LANDS.

Mr. George S. Frost, advertises 500,000 acres for sale.—See page 99.

MILLINERY.

Mrs. Macadam, 79 Woodward avenue, being exclusively engaged in this Department of business, we take pleasure in referring to her advertisement, at page 99. Mr. Macadam will not be displeas'd at our noticing that he makes a very respectable Milliners apprentice.

CARRIAGE BUILDERS.

See List of Advertisers in the Index.

FARRELL & BROTHER.

These Gentlemen having moved since our former edition to 64 Woodward avenue, we desire to call special attention to their advertisement on page 101.

THE PENINSULAR BANK.

We observe the management of this old Established Bank of Issue is under the management of Mr. Emory Wendell, as Cashier.—See card page 102.

BOOKBINDING, &c.

We call the attention of friends to the card of Friend Palmer, to be found on page 102.

GIN:—A HOUSE WITH A GOOD CHARACTER.

A good character is always worth appreciation, and we discover that the old Quaker House of A M Binninger & Co, as importers and dealers in pure OLD LONDON DOCK GIN, GENUINE COGNAC BRANDY, and OLD KENTUCKY BOURBON, they are properly certified and endorsed by the New York leading newspaper Press. This Importing House is Established since 1778, and must certainly have conducted its business with fairness and respectability, or the name would have perished long ago. We presume many people are literally poisoned by the wretched liquors permitted to be vended, but for medical remedial purposes, such leading houses as this should be protected by Law in its penalties against the manufacturers of villainous liquors. The advertisement of A M Binninger & Co, 19 Broad Street, New York, will be found at page 103.

SEWING MACHINES.

Even although not advertised in the Directory, we yet would be glad to find all the dealers in Sewing Machines selling extensively. Every dwelling should have a Sewing Machine, a Piano and a Washing Machine—and the mothers and daughters of every body's family should be instructed in the use of each of them. The superior good qualities of the Singer Sewing Machines are we understand generally acknowledged. Mr W R Woodruff, agent, at 58 Woodward avenue, will, of course, supply all necessary information on application.—Refer to Advertisers' Index.

THE ADVERTISEMENT OF HOWES' SEWING MACHINE AGENCY.

Mr J E Eagle, 77 Larned Street East, will be found on page 330.

FORSYTH & CO,—62 Woodward avenue.

HOW THE NATIONAL REPUBLICAN PARTY ORIGINATED.

Until 1860 in the Election of Abraham Lincoln, although the United States were acknowledgedly A REPUBLICAN CONFEDERACY—as they ever will continue to be—yet, paradoxical as it would seem, there was no *Republican Party*—no not even in a State, for State Election Issues. There was, to be sure, *the party par excellence of the Nation*—the Great Democratic Party—and this Party would, as the name itself denotes, maintain itself perpetually in the ascendant, but that SAM's commands had to be attended to in allowing the Whigs into power in the proportion of about the revolving cycle of every third Presidential term. Now, a "*Rose will smell as sweet by any other name!*" The origin of the *Republican Party* however, as a matter of history, occurred in Michigan, and as a matter of history it may as well be correctly chronicled in this Directory. It Requires that men shall be impartial to make faithful Historiographers!

We ourself had not been a citizen of the *United States* in the fall of 1854, although in October 1850, had declared intentions. Business having led us into the Sanctum of Joseph Warren, one of the then Editors of the Detroit Tribune. We were canvassed to vote for the Whigs at the approaching Election, by the Hon. O. M. Hyde. We could have voted in the Election of State Officers, but declined doing so until fully invested with the privileges of a Federal Citizen—and so we stated to friend Hyde, who thereupon inquired of us how it was that foreign born citizens invariably entered the ranks of the Democracy. and gave that party their votes? Necessarily we were under obligation to explain and proceeded: "There is something, said we, after all, *in a name!* Immigrants to the United States of America leave their respective countries, averse to their monarchical & aristocratical governments, and on looking around on their arrival to determine how they shall exercise the franchise they find the Democratic Party has in its nomenclature a Republican significance, and they therefore vote in and with that Party—if you Whigs sink the unmeaning name by which your party is distinguished, and call yourselves "*REPUBLICAN,*" the people of the several European Nationalities will divide their votes between the parties, and you will by this fusion have a chance of a majority and probably permanent stability. The Irish born people will especially do this, for they would recall O'CONNELL's familiar character of the Whigs of Britain, whom he designated as "*The Base, Bloody and Brutal Whigs.*" A fusion of parties did take place, necessitated by important questions not now necessary to particularise. Having called in to assist in its management some old school Democrats, as Kinsley S. Bingham, who in fact incubated the party into its wide-spread proportions, (*like the turkey hen story he used to talk about during the late Campaign*)—the Michigan State Republican Party took form, and became consolidated, by the election of Bingham as Governor, to which office he was re-elected, and he has been no unimportant instrumentality in nursing the party into puberty as a great national success, which in the teeth of the slave power, and other nameless influences enables the nation to claim a Republican President at its head. The party has all the elements of wisdom, enlightenment and liberality, to enable it to retain its strength as an established national party power. We do not say this because we are ourself a Republican, for we believe it will conduce to the political health of the commonwealth that the Democratic party of the nation instead of being a Northern protective outpost of slave owning interests—fostering negro labor to the prejudice of the white immigrant population in States where colored labor should not be encouraged—shall return to first principles founded on broad national justice as known to be maintained by the Fathers and founders of our national freedom—and found purified from unholy affiliations with institutions antagonistic to our Republican and Democratic Liberties, on issues other than slavery, on national and international expediency—the party now in opposition will of course have its alternations to Federal Power—and both political parties, which of course constitute the nation, will live happily in pleasant fraternal political conflict for the right to govern, when slavery shall be found existing, properly hedged in and protected by the Federal power in not more than the few States which bound the Gulf of Mexico.

We have never yet been helped to a *slice of office* by UNCLE SAM or any of his State Sons, and we think it but just that we apply for a *caveat* to the new patent office commissioner for our successful invention—which in its national use involves so many funny complications, but which on fair trial by "*HONEST ABE*" will be pronounced by every body an article of indispensable utility from MAINE to OREGON. State and City Rights sold on reasonable terms!

UNITED STATES GOVERNMENT.

The eighteenth Presidential term of four years began on the 4th of March, 1857, and will expire on the 3d of March, 1861.

James Buchanan, of Pennsylvania, President, salary \$25,000; John C. Breckenridge, of Kentucky, Vice President, salary \$8,000; Lewis Cass, of Michigan, Secretary of State, salary \$8,000; Howell Cobb, of Georgia, Secretary of the Treasury, salary \$8,000; John B. Floyd, of Virginia,

Secretary of War, salary \$8,000; Isaac Toucey, Connecticut, Secretary of the Navy, \$8,000; Jacob Thompson, of Mississippi, Secretary of the Interior, salary \$8,000; Joseph Holt, of Kentucky, Postmaster General, salary \$8,000; Jeremiah S. Black, of Pennsylvania, Attorney General, salary \$8,000.

The Cabinet.

The Cabinet consists of seven members; viz: the Secretary of State, Secretary of the Treasury, Secretary of War, Secretary of the Navy, Secretary of the Interior, and the Attorney General and Postmaster General, who are the special advisers of the President.

United States Congress.

The Congress of the United States consists of a Senate and house of Representatives, and must assemble at least once a year, on the first Monday in December, unless otherwise directed by law.

The Senate is composed of two members from each State. They are chosen by the Legislatures of the several States for the term of six years, one-third being elected biennially. The Vice President of the United States is President of the Senate, having the casting vote when the votes of the Senators are equally divided. In case of his absence or death, a President *pro tempore* is chosen by the Senators from their own body. The Senate at present consists of sixty-six members.

The House of Representatives is composed of members from the several States, elected by the people for the term of two years, and apportioned to the population in the following manner. After each decennial census, the Secretary of the Interior is to add to the whole number of free persons—including those bound to service for a term of years, and excluding the Indians not taxed—three-fifths of all other persons. This aggregate is to be divided by 288, and the quotient, rejecting fractions, is to be the ratio of appointment to the several States. The representative population of each State, ascertained in the same manner and divided by the above named ratio, will give a quotient which is the appointment for that State. Any loss by fractions is to be made up by assigning to as many States having the largest fractions, as may be necessary to make the whole number of representatives 288, one

additional member each. And if, after the apportionment, new States are admitted, representatives are assigned to such States on the above basis in addition to the limited number of 288, but such excess is to continue only till the next apportionment under the succeeding census. Besides the representatives from the States there is a delegate from each territory, who has a right to speak but not to vote. The compensation of the members is \$8,000 per annum, and that of the Speaker \$6,000, and \$8 for every twenty miles travel in going and returning. The House of Representatives is composed at present of 237 members, besides seven additional from the organized territories.

United States Courts.

THE SUPREME COURT.—Chief Justice, Roger B. Taney, of Maryland, salary \$6,500. Associate Justices, John McLane, Ohio; James M. Wayne, Georgia; John Catron, Tennessee; Peter V. Daniel, Virginia; Samuel Nelson, New York; Robert C. Grier, Pennsylvania; John A. Campbell, Alabama; Nathan Clifford, Maine; salary \$6,000. This court is held in Washington, and has but one session annually, commencing on the first Monday in December.

CIRCUIT COURTS.—The United States are divided into ten judicial circuits, in each of which a Circuit Court is held at least twice a year for each State within the circuit, by a Justice of the Supreme Court, and the District Judge of the State or district in which the court sits.

DISTRICT COURTS.—The United States are also divided into fifty-one districts, in which the District Courts are held by forty-two district judges. And in each of the territories there is also a judge and two associate judges, appointed by the Executive of the United States.

International Relations.

The pay of Envoys Extraordinary, the Minister Plenipotentiary, and so of Charges, Secretaries of Legation, and of Ministers Resident, varies with the country to which they are commissioned. The United States are represented by Ministers Plenipotentiary at the courts of Great Britain, France, Spain, Russia, Prussia, Mexico, Brazil, Chili, Peru, and China; and by Charges d'Affairs or Ministers Resident, at the courts of most of the other foreign pow-

ers with which this country is connected by commercial intercourse. There were also, in November, 1858, 206 Consuls and Commercial agents from the United States residing in foreign countries; and 28 Ministers and Charges, and 497 Consuls and Commercial agents from foreign countries in the United States.

National, Naval and Military Strength,
(Exclusive of all State Militia or Volunteer and Independently organized Military Companies.)

THE ARMY.—The authorized strength of the United States army is 18,165, officers and men; the actual strength, is 14,980. This force is divided into 19 regiments, garrisoning 66 permanent forts, and 70 military posts in different parts of the country. The whole territory of the United States is divided into six great departments, in which there are 25 arsenals and armories, besides the camps and forts above mentioned.

THE NAVY.—The navy of the United States has (1859) captains—active list 81, reserved list 20; commanders—active list 116, reserved list 17; lieutenants—active list 340, reserved list 36; surgeons of various grades, 147; pursers 64; midshipmen and other officers down to assistant engineers, 529. Ten ships of the line, 10 frigates, 21 sloops of war; 8 brigs, 25 screw steamers and tenders, 8 side-wheel steamers, 8 store-vessels, 5 permanent and receiving ships, a naval asylum, a naval academy, and 8 navy-yards.

The foregoing Exhibit of our National strength, is no correct index of the Military power of the United States—the population of which now numbers probably thirty-six millions. Our people are all marksmen. Even our very wives and daughters shoot true to a hair. The national spirit of our beloved Republic, if once aroused by internecine animosity, or the pragmatical meddling of monarchical governments with our Federal privileges would sweep an invading enemy to Tophet with the besom of destruction. In fact, every youth, adult, and old man of years, is a soldier in America—with hearts full of manly, Revolutionary fighting-pride, subdued into intelligent unobtrusive courage. Such is the ring of true metal—the offspring of Education and honorable training. We have heretofore suggested, that a Michigan State "Army List" should be published annually, under the patronage

of the Adjutant-General and State Authorities. Such a work would, no doubt, pay an enterprising, military gentleman, who could prepare the work at leisure hours. In fact, so entirely secure do we feel, in our peaceful, industrial and social relations, that a necessity seems to exist to wake up a laudable military spirit throughout the Union, which we are happy in believing is irrefragably founded on the justice of our Constitutional State relations.

AUDITING, OR WAYS AND MEANS.

E. Shepard, and W. S. Bond.

The established value of school property vested in the Board of Education at this date, 1860, is ONE HUNDRED THOUSAND DOLLARS.

The income of the Board for the 1859, was . . . \$38,599,25

The expenditure amount to . \$31,042,82

The present debt of the Board is . . . \$9,400,00

The following, presents a summary of the corps of instructors employed by the Board, and their salaries.

1 Principal, High School, at a salary of \$1,000.

1 Assistant, \$500.

4 Principals of Union Schools, \$3,600.

4 Heads of Junior Departments, at \$750 each, \$3,000.

4 Senior Assistants in Union School, \$400 each, \$1,600.

1 male teacher, colored school, \$400.

46 Primary Teachers and assistants in Union Schools, at \$300 each, \$13,800.

2 Primary Teachers, at \$259 each, \$5,00
1 Teacher of Music, \$300.

This last is by no means *the least* important instructor, as it is time to recognize music as an essential element of education, and every teacher should be competently instructed. Instead, therefore, of paying a music teacher the trifling salary of \$300, there ought to be at least four music teachers appointed, one for each Union School District. Music and calisthenics are essential elements of popular education. The children, both male and female, should be instructed to carry themselves erect. The "*backboard*" exercise should be practiced at their recesses, which should invariably be superintended by the teachers, who should appoint monitorial disciplinarians. By this training, the children would overcome the injurious decrepitudes, incurvatures and excurvatures, which close application to their studies superinduce. This kind of exercise develops and invigorates the mind, as well as the muscular system; gives buoyancy and independent ease of carriage to the body; and the rudiments of military movements are acquired, as mere healthful, playful exercise, by every pupil, under the teachers own eye, during the periods of the day devoted to "recess" or relaxation from school study, but which periods are now generally occupied in playing at marbles, tricking, gambling, cursing and scheming other idle pursuits after school hours. A model school for instruction of monitors from the several departments, in order to systematise and ramify the operations of a plan, such as suggested, would be a paying investment by the Board, and such *physical training* should be practiced in every public school in the United States, everywhere—everywhere! throughout the world at large.

The following is a list of the teachers, of which there are 65, whose salaries amount to \$24,800.

High School, Miami Avenue, Principal, Prof. H. Chaney, salary \$1,000.

Assistant, Elisha Jones, salary \$750.

Assistant, Miss E. M. Polly, salary \$500.

Teacher of French and Drawing, Prof. E. St. Alary.

The most complete and satisfactory report ever heretofore made by the Board, has been published for the year 1859-60. It has been ably methodised, and the tables contain all desirable information. From allusions to the efficient services of Messrs. Warner and Wilkins, by the President, D. B. Duffield, the Detroit community have much reason to feel well pleased with the election of these valued friends of the cause of our governmental system of public instruction, than which it is manifest, there is no public educational system superior in the world.

The following are the totals of pupils attending the schools, as gathered from the reports of the Union School teachers:

HIGH SCHOOL.

Whole number of pupils,	68
Barstow Union District,	1,490
Bishop Union District,	1,422
Capital Union District,	1,338
Eight Ward Union District,	2,207

Total, 6,565

It is noticed, there is a want of uniformity in the tabular returns of the principals. A uniform printed blank return furnished the several teachers, would facilitate reference, and the footing up of the columns of figures.

BOARD OF SEWER COMMISSIONERS.

William Barclay, Alanson Sheley, Theo. H. Hinchman, office 110 Griswold street.

The Sewers in Detroit.

From the report of the Board of Sewer Commissioners, we glean some interesting facts, a portion of which we present in tabular form as follows:

Statement showing the sewers built and amounts expended in their construction from 1836 to 1859 inclusive:

WHEN BUILT.	NO. OF FT.	AMT. EXPENDED
1836	3,038	\$22,546,71
1837	3,853	6,818,90

When Built.	No. of Feet.	Am't. Expended.
1847	244	95,00
1848	5,068	6,783,83
1849	3,402	6,233,83
1850	2,817	4,092,00
1851	10,901 1-2	20,829,20
1852	3,684	15,571,05
1853	9,741	28,739,90
1854	70,832	25,705,06
1855	72,874	26,802,71
1856	11,772	40,784,62
1857		5,973,30
1858	8,014 1-2	26,504,00
1859	70,507	33,886,66

Total 18,43-100 miles \$270,996,88

By the above, it will be seen that out of twenty-four years that have elapsed since the system of sewerage was begun, work has been done about 15 years. For this time the average length of average built for each year, has been 1 1-4 mile.

POST OFFICE STATISTICS FOR MICHIGAN.

From official reports, we take the following statement of Post Offices in this State, the salaries of whose Postmasters and the nett proceeds of the office exceed \$1,000.

Adrian	1,967	2,482
Ann Arbor	1,827	8,233
Coldwater	1,110	9.9
Detroit	2,000	19,221
Flint	1,148	1,169
Grand Rapids	1,732	2,754
Hilledale	1,071	1,199
Kalamazoo	2,000	2,779
Lansing	1,913	803
Marshall	1,326	1,938
Niles	1,174	1,820
Pontiac	1,088	1,129

The following is also a list of mail routes in this State, the cost of one year's service on which, equals or exceeds \$10,000.

Detroit & Milwaukee R. R. (6 months)	2,400
Michigan Central R. R.	42,275
Michigan Southern and North'n Indiana R. R.	36,800

There are some curious facts shown in the first statement. For instance, the Post Office at Ann Arbor, which has not as large a population as Adrian, Grand Rapids, or, probably, Kalamazoo and Flint, has greater nett proceeds than all these. Is this attributable to the University and a large body of students, or what is the cause?

THE LIBRARY

Is on the third floor of Young Men's Hall. The rooms are very small and illy adapted, but the Society is determined to build a new Hall at no remote period, when a Library shall be constructed, the public may be assured, commensurate in magnitude, adaptation and elegance, with our progressive age.

The Cases are well stocked with select Historical, Poetical, Scientific and Miscellaneous Works, including the current Periodical Literature. The hall is open from 11 A. M. to 12 P. M., and from 3 P. M. till half-past 5 P. M., and from 7 P. M. till 9 P. M., on week days.

The Library contains 4,161 volumes.

Terms of Membership—Two Dollars initiation, and two dollars annual subscription.

The Society realized from Public Lectures during the season of 1859-60 the

sum of \$575.36; from Initiation Fees, 1,035 dollars; from rents, 1,568 dollars; means, 2,071 dollars. There is at present in Treasury, 1,144.15 dollars.

A very ably collated Report, from S. D. Elwood, Esq., for the year 1859, furnishes many interesting particulars, and may be obtained from that gentleman in pamphlet form, together with a printed Library Catalogue.

Michigan State University.

The State University is at the city of Ann Arbor, 39 miles from Detroit, Westward, on the Michigan Central Railroad. The population of Ann Arbor may now, probably, be 8,000. The College grounds are very pleasantly situated, and the encircling landscape is cheerful and charming. The clear, gravelly-bedded Huron winds its way through the city. The circumjacent country is rather thoroughly improved, and of undulating and pleasingly diversified aspect. Our public institutions are located with a correct regard to their distribution over the whole area of the division of the State called "the lower peninsula." Ann Arbor was fortunate in being selected as the site of the State University. Between five and six hundred students, assemble here, and it is reported favorably of the discipline of the several departments of the University, that the general morality and gentlemanly deportment of this large number of young men, separated from the restraints of domestic control, are not surpassed at any similar institution in America.

Michigan State Normal School.

This extensive Educational Institution is located at Ypsilanti, 30 miles from Detroit, on the Michigan Central Railroad, and distant from Ann Arbor City, the site of the University, 10 miles. The institution was rebuilt recently, it having been consumed by fire.

FACULTY.

[Not having received the Annual Report, the names are omitted.]

Ypsilanti is a very pleasing city, and it is rendered attractive by the diversified as-

pect of the country surrounding it. The always cheerful looking Huron River passes through the city.

Detroit Female Seminary.

This Institution is located on the North-east corner of Fort and Wayne Sts. It was founded in September, 1859, under the charge of the Rev. J. V. Beane, late of the Salisbury Mansion School, Worcester, Mass, as Principal, with whom several competent assistants are associated. For terms, &c., &c., see advertising Department of this Directory.

Bryant, Stratton & Goldsmith's Commercial College.

Is located in Merrill Block, corner of Jefferson and Woodward avenues.

On visiting this Commercial Educational Institute, we found a large number of young men, aged between 18 and 26, acquiring a thorough knowledge of accounting, and of all that relates to the business of the Merchant. In a commercial point of view, these excellent adult schools cannot be too highly valued. For terms, &c., refer to Advertising Department of this Directory.

Detroit Classical and Mathematical School.

This School has been recently opened on the South-west corner of Shelby and Fort Sts., under favorable auspices. For terms, &c., refer to Advertising Department.

THE CHURCHES OF DETROIT.

St. Paul's Protestant Episcopal Church, corner of Congress and Shelby Sts., built of stone, December, 1852. It is a good specimen of English Gothic architecture.

The Mariner's Church, Protestant Episcopal, corner of Woodward avenue and Woodbridge St., built of stone and in the castellated Gothic style.

St. John's Protestant Episcopal Church, at present erecting on the corner of Woodward avenue and High St., is to be a magnificent building of stone and to cost 50,000 dollars.

Christ Church Protestant Episcopal. The large wooden building heretofore used by this congregation on Jefferson avenue is to give place to a superb church building, the plans for which we recently had the pleasure of examining.

Fort Street Presbyterian Church is built of stone and roofed with slate. It is a specimen of the early decorative style of Gothic architecture.

The Jefferson Ave. Presbyterian Church is of brick, with mastic finish in imitation of freestone, and is built in the perpendicular style of Gothic architecture.

The State Street Presbyterian Church is on the corner of State and Farmer streets, and is a handsome brick edifice, paneled and turreted, with very appropriate interior decorations.

The Congregational Church is situated on Fort St. west, corner of Wayne, and is a remarkably neat and well-appointed building throughout. It is built of brick, mastic stuccoed walls in imitation of freestone. This building presents exteriorly as well as interiorly very agreeable details of appearance and arrangement.

The Baptist Church on Fort St., corner of Griswold, now (1860) in process of erection.

The Baptist Church, Washington Ave., corner of Clifford, is another superior and capacious brick building.

The Old Style Presbyterian Church, now in progress of erection on Washington avenue, near Grand River St., seems to be intended as of a class with the foregoing in beauty of style and durability of material.

The Unitarian Church, corner of Lafayette and Shelby Sts., is a neat plain brick edifice, of good capacity and in character with propriety of design.

The Methodist Brick Churches on Woodward avenue and Randolph street, are capacious buildings, but are deficient in style of architectural beauty, and will no doubt at no very distant day give place to more beautiful and more capacious structures.

There is a neat little brick Church (Methodist) on Seventh St., corner of Walnut, judiciously located.

The Catholic Cathedral, corner of Jefferson avenue and Antoine St., is a massive brick pile, of no particular order of symmetry in architecture. It is very capacious and elaborately decorated, and embellished with superior paintings of Cathedral sanctity, and possesses a splendid organ. Two thousand persons, probably, may be conveniently seated in this large building, which is yet unfinished as regards the spire, which is intended to be of unusual height, and to be completed in 1861.

NOTE.—The Rev. James Hennessy is at present having erected a parochial church in the neighborhood of Woodward avenue, on Adelaide St.

The Trinity Catholic Church, on the corner of Porter and Sixth, is another large building, not yet completed with spire.

St. Ann's Church (Catholic and French) is an old edifice, and in the days of its erection certainly gave evidence of liberality on the part of its founders, when Detroit was comparatively a small city.

There is a brick German Lutheran Church, corner of Monroe Ave. and Randolph St., plain in its style but capacious. It lost its spire by a storm of wind, 1859.

There is a substantial brick church on the corner of Croghan and Beaubien, in the use of the German Methodists.

There is a German Catholic church edifice of brick on the corner of Croghan and Antoine, of ordinary architecture, but capacious.

There is also a French Protestant church on Rivard St. built of brick, and of respectable dimensions.

There is also a substantial brick Methodist Meeting House on La Salle Ave., in the 9th Ward.

In addition to the above excellent church accommodation, there are numerous other churches which, partaking of the perishable nature of frame buildings, are not entitled to be classed with the more modern, improved and substantial edifices we have already noticed, but which are noticed as church organizations in the following "Church Directory."

There are three substantial and handsome churches to be erected shortly West of Eighth St. and South of Michigan Ave., namely, by the Protestant Episcopal, Scotch Presbyterian, and Methodist denominations.

The Annual Report for the year ending Dec. 27, 1859, contains 108 pages, it is admirably collated, and evidently shows that the office of Grand Secretary is no sinecure, but involves considerable labor. We approach Grand Secretary Fenton with due deference in suggesting that he append an Index to his future Reports, which would facilitate reference to its annually increasing pages. The unparalleled prosperity of the Masonic craft in the State and throughout the world at large, is very gratifying. Good men in every country on the globe are respecting the benign and civilizing influences of the Masonic order. We here take occasion cordially to recommend the well edited and handsomely printed bi-monthly Masonic newspaper published at Louisville, Kentucky, by Brothers Messieurs Morris and Monsarrat, entitled the "Voice of Masonry," now in its third annual volume, and mailed to subscribers at one dollar per annum.

We publish the following interesting statistics, relating to the fraternity in Michigan:

There are in the State of Michigan 128 Lodges, in which there were initiated during the last Masonic year 955 new members. There were admitted and made, 928. Demitted, 225. Expelled, 28. Applicants rejected, 281. Died, 62. Suspended, 154. In membership, 5,816.

Admiral of the Port, Capt. J. W. Hall

A very able statistical report of the resources of the State of Michigan generally, was recently prepared by Ray Haddock, Esq., for which he should have been presented by the Board of Trade, with a substantial mark of approbation. Certainly no statistical paper was ever collated in the State that might be circulated as an immigrant pamphlet, with equal advantage.

America is very remiss in not protecting more effectively her own manufactured wares and fabrics. The true principles of Government on this subject, would be, to encourage capitalists to invest in the United States, by a high protective tariff. The news of protection to American industry, on reaching Europe, would determine great numbers of artisans to abandon the old world, and if protection were only secured by Federal Legislation capital would greet these men on their arrival from countries where monopolists avail themselves of their labor *as a drug*, from its excess and consequent availability. We are not able now to print a statement of imports which could we do so without doubt would present a startling summary of all the *finery and frigmagigs*, we encourage the manufacturers of Europe to make for us, without any countervailing advantages of "Free Trade and sailors rights," but which operates injuriously to our immigrant system, and drains off our circulating medium. Western agrarian industry is much too heavily taxed by the unreasonable, enough demands of wives and daughters to be dressed grandly, in the adjustment of the balance of trade on account of *Fineries and Fundangoes* verses *Flour and Raw Wool*. The wealth of England is attributable to the sagacity of her government, in protecting her manufactories, and then in the safe

convoy of their wares to the markets of every country in the world, with most of whom she had first played out the policy of a successful billigerant initiation. But it has been called a *liberal democratic* policy to flood the United States, with articles manufactured abroad, and also to obligingly send abroad our raw material, to be manufactured for us at a great expense of transport either way, at a distance of 3 or 4000 miles, just to patronize a people to whom we owe money for building Railways and other avenues of transport, to facilitate the sale amongst us of their own manufactures. Bah! we shall soon be as poor and ragged as the down-trodden *agricultural Irish!*

The following articles are sent down to feed our busy artisans at the East, who are more profitably engaged in manufacturing. We notice, however, that *they do not eat grindstones*, they want them however, and *we want* what we foolishly send down the lakes, and at the East, they are foolish enough to let it off to England and France, the ONE MILLION, ONE HUNDRED AND FIFTY THOUSAND, THREE HUNDRED AND TWENTY DOLLARS WORTH OF wool of Michigan, which is freighted back again to us, at an enormous exchange above the sum of money the manufacturer paid the producer in Michigan, for the raw material; just because our capitalists will not invest in erecting home factories, and the farmer *cares not* who he sells to, and the empty condition of our banking and exchange systems at the West, is in *fecer* to get from buyers and shippers to Europe, *the handling* and use of a few hundred thousand handsomely engraved promises to pay the bearer on demand. We did not intend to open out the evils of this condition of national *Democratic* generosity towards transatlantic cousins. But the monied condition of the nation seems on the verge of ruin, arising from the neglect of home manufactures. It were folly to conceal this suicidal neglect of the interests of the thirty-five or forty millions of people who, either by nativity or choice are Americans. Capital at the west, should be both created and consolidated, with a view to encourage home labor, which never absorbs or wastes money, never removes it from the channels of available circulation and utility.

Executive Committee, R. N. Rice, H. N. Walker.

We understand these urgently needed local improvements are to be efficiently carried forward to completion on some of the lines during the year 1861. When all shall be accomplished the rush to Detroit to settle will greatly enhance the present price of Real Estate.

What is capital lying idle for? Why not forthwith build factories? We have been informed that a company is about being organized of the wealthy Real Estate owners, with a view to the erection soon of Cloth, Silk and Cotton Manufactories at Detroit, the results of which will be, with a solid Banking system, that we shall have an abundant currency and our people employed and satisfactorily paid in hard cash.

The public are beginning to be strongly excited in the hope of at last realizing long looked-for advantages from manufactories erected by the wealth the masses have created by their very settlement in Detroit for this class of property owners.

"Property involves duties as well as rights."

CATHOLIC SOCIETIES.

Congregation of Redemptorists and Christian Brothers.

These Brothers (there are different orders,) are engaged in the benevolent enterprise of instructing the children who are not accommodated in the city Public or Government Schools, and probably fifteen hundred children of both sexes are instructed by them and the Sisters of Charity at their respective schools in the several districts of the city. The compiler acknowledges the courtesey of the Brothers located at the corner of Croghan and Antoine sts, who at his request, urbanely conducted him through the halls, dormitories, kitchen and arbors, school rooms, &c.

The names of the order residing at the corner of Antoine and Groghan are:

Lay Brothers, Jacob Le Jeune, William Brockmeyer, John Hermann.

Of the order located at the corner of Antoine and Larned sts, the name of Brother Joachim was supplied only.

Sisters of Charity.

These Sisters, like the Brothers, are engaged in works of benevolence. They take care of the sick at their Hospital, St Marys, Clinton st.—they teach an extensive Acad-

emy for young ladies on Jefferson avenue; they teach a large school on Antoine near Fort st; they also teach a school in the Eighth Ward, as do also the Christian Brothers; and they have during the last year founded an Hospital near Michigan avenue and Porter Road, where insane patients are confided to their care.

St. Mary's Hospital.

This Hospital, which is a private Institution, and one which, in the absence of a public Hospital commensurate with the demands of so large a city as Detroit, has rendered good service to many a wretched sufferer, is efficiently attended by the city physicians, and receives an appropriation from the city Government. The Sisters of Charity are the patrons, nurses and proprietors of the Institution.

The Hospital is located on Clinton street near Antoine. It is capable of accommodating about 200 patients.

Guilds of Saint Peter and Saint Paul.

This is a Society of Catholics which admits to its councils and deliberations members of the order only.

Its meetings are held at the Guild Hall adjoining Trinity Church on Porter street. There are 20 counsellors, 2 for each ward of the city.

FIRE DEPARTMENT.

Firemen's Hall, Corner Jefferson avenue and Randolph street.

There are 12 efficiently organized companies, together with 2 Hook and Ladder Companies.

The department forms a brigade of great power, as well as local influence, and it must necessarily continue to increase in numbers as the population increases. The force now numbers about 650 men. It is governed in its internal relations by a salutary discipline of its members. But the demands upon the valuable time of the individuals who have generously devoted themselves to the protection of public and private property, is a matter of no small consideration, and a laudable desire seems to prevail to aid the Department by the introduction of steam engine power.

One fine Steam engine "*Lafayette*," has just been put on the strength of the brigade, and serves in a similar relation as artillery to musketry.

The value of Real Estate and movable property vested in the Department at the present date is roundly estimated at \$100,000.

*This Company is properly belonging to and under the patronage of the Michigan Central Railroad Company, and we understand that W. K. Muir, General Superintendent of the Detroit & Milwaukee Railroad, is about organizing a Steam Fire Company to be completely equipped at the Railway Company's expense.

Paid watchmen are stationed in several of the belfries of the city, that an immediate alarm of fire may be made, and the thorough vigilance of the Department deserves corresponding appreciation from the

numerous Insurance Companies deriving revenue from our populous city.

Certainly the moral discipline, as well as the effective operative conduct of the Detroit Fire Department is deserving of praise, creditable alike to its members, as well as the fair name and fame of the city of Detroit.

MILITARY.

The numerous Regiments of the Michigan State Militia requires the publication of an occasional army list. The State executive has proven itself a sorry patron of all such enterprises.

We here print the names of the staff of First Regiment, with the officers of the several Volunteer organized companies resident in Detroit.

First Regiment M. M.

Band Master, —

We observed with admiration the drill
 of this "Crack" Company recently. As
 a volunteer citizen soldiery *the men*, uni-
 form, discipline, and every circumstance,
 embraced within the Company, arrange-
 ments are superior and admirable. The
 Company was *elite* when it first organized,
 it cannot now anywhere be excelled; and
 the fine and richly appointed Band of the
 Company is also highly creditable. The
 members of the Company, collectively and
 individually, are popular citizens of social
 position and influence.

It is respectfully suggested that the
 sword worn by the band is too long—a
 curved sabre,— the point not descending
 much, if anything, below the knee—with
 fancy ivory hilt and silver-plated scabbard
 mounting, would add much additional lus-
 tre of appearance.

The Drum Major, we think, would look
 better in the uniform of the band, except
 the *chapeau*.

Shields Guards.

We have not been informed whether
 this Company is senior in its date of or-
 ganization to some other companies. The
 Yagers were organized in the same year
 1853. We give the Shields precedence,
 therefore, by alphabetical arrangement.

This Company is volunteer, and in-
 dependent of the State, except in their rela-
 tions to State authority as individual citi-
 zens. Uniform, arms, and appointments
 are the present property of the members
 of the Company, which is creditably of-
 ficed and disciplined.

Armory, No. 133 Michigan avenue, West,
 where the guards have a capacious drill
 room.

OFFICERS.

Captain, Edward Mulloy.
 First Lieutenant, James W. Purcell.
 Second Lieutenant, P. Casserly.
 Third Lieutenant, John Lanigan.
 Ensign, Thomas Finn.
 Color Sergeant, —
 Second Sergeant, M. Buckley.
 Third Sergeant, P. Dollard.
 Fourth Sergeant, W. Dooley.
 First Corporal, James Cosgrove.
 Second Corporal, M. Horan.
 Third Corporal, P. Carr.
 Fourth Corporal, C. Hogan.
 Fifth Corporal, J. Hagerty.

Armorer Corporal, James Cosgrove.

☞ This Company has just disbanded.

Detroit Yagers.

Armory, Gratiot road, near tollgate. The Company numbers 60 men, and was organized June, 1853. This is an Americo-German Company. Uniform rifle green, Roman helmet, rifle and dagger. The men are athletic, and formidable.

OFFICERS.

Captain, A. Lingeman.
First Lieutenant, Paul Gies.
Second Lieutenant, Peter Huffnagle.
Third Lieutenant, John Hensterbeck.
Color Sergeant, Frank Betz.
Second Sergeant, John Kauter.
Third Sergeant, Anthony Betz.
Armorer, Caspar Lingeman.

Detroit Light Infantry.

Re-organized March, 1860.

Armory, Woodward avenue, above State street.

This is a company of young men, in minority, armed with muskets, and the members are highly expert at the evolutions, and in the manual and platoon. The uniform is becoming. The moral as well as official training of the young men is praiseworthy. The Captain is a son of Major Maclin of the United States Army. These lads are not wholly absorbed with the questionable sentiment of *Military Glory!* but are found engaged in the more utilitarian pursuits of life.

OFFICERS.

Captain, W. J. Nesbitt.
First Lieutenant, J. Hull.
Second Lieutenant, E. Boulter.
Third Lieutenant, P. J. Baier.
First Sergeant, G. Wilcoxson.
Second Sergeant, J. P. C. Crawford.
Third Sergeant, R. Duryea.

**RAIL WAYS.****Michigan Central Rail Road.**

This old Western Line, which, since its completion to Chicago in 1852, has done excellent service, not only to the State of Michigan, but to the Western country generally as an avenue of travel, under the efficient and admirable management of its Superintendent, and the thoroughly systematized action of its officers and operatives, has ever maintained the reputation of a very superior railway, while it is noticeable of the line that the managers have been liberally appreciative of the comforts and convenience of the traveling community, and the interests of commerce, it is gratifying to note that the annual report exhibits an increase of receipts, corresponding with the increase of population, production, and consumption.

Several cities and villages of magnitude have grown into commercial and manufacturing importance along its line. Among them we notice Ypsilanti; Ann Arbor (the site of the State University); Dexter; Jackson (the site of the State Prison); Albion (the site of the State Wesleyan Seminary); Marshall; Battle Creek; Kalamazoo (the site of the State Lunatic Asylum, and the State Baptist College); Paw Paw; Decatur; Dowagiac; Niles; Michigan City (in Indiana); and Chicago in Illinois, together with a large number of thriving villages of minor, but by no means of insignificant importance, as regards population and commerce. It is the great common carrier to market of the products of one of the most fertile agricultural regions on the continent. The distance to Chicago, in Illinois, by the

Michigan Central Rail Road is 284 miles, through a picturesque and diversified country.

It is an historical fact, which may be noted as a matter of Directory record, that on the 21st day of September, 1860, the Prince of Wales (the heir apparent to the British Monarchy) with his suite, including the Duke of Newcastle, the Marquis of Normanby, Earl St. Germain, General Bruce, and several other distinguished British officials, passed over this pleasantly graded, and elegantly appointed line to Chicago, in the State of Illinois, having expressed unqualified encomiums on the superior grade, precaution and general police of the Michigan Central. Upon which occasion as a token of his appreciation of the attentions of Mr. Rice, the Prince presented that gentleman with a diamond pin of exquisite workmanship, upon which is wrought the heraldic crest and motto of the Prince, who, we are informed, stated unreservedly his opinion that no English railway line existing could rival in its general details this model road.

The Directors chosen June 25th, 1860, are:

John W. Brooks, Boston.
Nathaniel Thayer, Boston.
R. B. Forbes, Boston.
H. H. Hunnewell, Boston.
Elon Farnsworth, Detroit.
Erastus Corning, Albany.
D. D. Williamson, New York.
Edward Minturn, New York.
J. M. Forbes, Boston.

OFFICERS.

President, John W. Brooks.
Vice President, H. H. Hunnewell.
Treasurer, Isaac Livermore.
Superintendent, R. N. Rice.
Auditor, William Boott.
Clerk, William B. L. Fowle, jun.
Assistant Superintendent, O. H. Hurd.
Local Treasurer, O. Macy.
Local Auditor, J. Newell.
Cashier, G. W. Gilbert.
General Ticket Agent, Thos. Frazer.
Chief Engineer, J. M. Berrien.
Master Mechanic, A. S. Sweet, jun.
Master Car Repairs, J. G. Sutherland.
Road Master, E. Division, Marshall, C. H. Whites.
Road Master, W. Division, Niles, S. R. Johnson.
General Freight Agent, Chicago, H. E. Sargent.

Assistant Superintendent, Joliet Division, C. Knowlton.

Great Western Railway.

This road is laid through Canada West; terminus at Windsor, opposite Detroit. Length of main line through Canada, via Chatham, London, Paris, Dundas, Hamilton, Niagara, 229 miles, with branch to Guelph, 28 miles, and one to Toronto from Hamilton of 38 miles, and from Komoka to Sarnia 51 miles.

Ferry boat Union to and from Michigan Central R. R. Depot, foot of Third street, and ferry boats Windsor and Ottawa, to and from Detroit and Milwaukee R. R. Depot. Also, ferry boats from foot of Woodward avenue.

This line, in connection with the Michigan Central, Michigan Southern and Detroit and Milwaukee Railroads, transports to and from the East and the States of Illinois, Indiana, Iowa, Wisconsin, &c., the vast interchanging traffic, merchandise, produce and stock, to their respective markets. The G. W. Railway has opened a continuous railway communication between the remote West and the Atlantic cities, and is inestimably appreciated by the public for the winter facilities of travel, which, until the completion of this line, in January, 1854, were not existing.

The Great Western extends its passenger and transportation connections, by the Grand Trunk Railway and by the several magnificent lines of steamers which navigate Lake Ontario and the St. Lawrence to all the cities of Lower Canada, and to the Atlantic Seaboard, both in Canada and the United States, and by the New York Central, Hudson River, Boston, Worcester and Western Railroads, and by the New York and Erie Rail Road to New York, Boston, &c., the Great Western Railway connecting with all the diverging railway lines through Michigan, Ohio, Pennsylvania, New York, Massachusetts and Maine. To and from St. Louis, New Orleans, and United States territories west of the Mississippi, this is a direct route from the New England States and the Canadas. The Company's stations at Sarnia and Hamilton, now provided with extensive grain elevators, renders that line the most eligible route for the transport of all kinds of grain from the great West to the seaboard.

OFFICERS FOR 1860.

Managing Director, C. J. Brydges.
 Financial Director, Thomas Reynolds.
 Secretary, W. C. Stephens.
 Assistant Superintendents, E. S. G. Colpoys (at Hamilton), and James Peacock (at London).

DIRECTORS.

In England, Robert Gill, President, Thos. Cullen, Alexander Hoyes and F. S. Head.
 In Canada, John Young, Vice President, C. J. Brydges, M. D., Thomas Reynolds, F. D., Richard Juson, Henry C. R. Becher, F. W. Gates and William Dickson.
 Head Offices at Hamilton, C. W.

The ticket office of the Great Western Railway is in Michigan Central R. R. Depot, foot of Third street, Detroit.

Detroit and Milwaukee Railroad.

This grand North western Line, which is substantially and efficiently appointed, connects the several New England, Middle and Western States with the new State of Minnesota, and by its extension from Pontiac to Grand Haven, has opened up to market several very fertile counties in Michigan. Passengers and freight by this line are conveyed across Lake Michigan by a line of superb steamboats, built expressly for the route. By the liberal enterprise of this Company the more remote regions of the West are brought into almost marvelous proximity, in point of time, with not only the great cities of the continent on the Atlantic coast, but by the regular continuity of Ocean Steam travel with the several countries of Europe. Several branches from this great line must eventually be built, in time, leading into the rich agricultural counties through which it runs in its direct course to its western terminus at Grand Haven. This line may properly be regarded as a continuation of the Great Western (Canada) Railway.

Verily these Railway Companies are great benefactors to mankind.

Including the more distant points in Minnesota to which Railway accommodation extends, and adding together the distances of the several lines by this route to the seaboard, we find the distance to be 1200 miles.

The Depot and offices of the Detroit & Milwaukee Railroad are on the extensive

docks of the Company foot of Brush st., which are probably 2000 feet in length.

The present officers of the line are:

President, C. J. Brydges.
 Vice President, Thos. Reynolds.
 Secretary, C. C. Trowbridge.
 Gen. Supt., W. K. Muir.
 Gen. Freight Agent, Jas. A. Armstrong.
 Master Mechanic, Benj. Briscoe.

Grand Trunk Railway of Canada.

The following *precis* of the organization and condition of this line will be perused in Detroit and throughout the State of Michigan generally, by the thousands of business men who are in constant reference to the Detroit Directory and Advertising Gazetteer of Michigan. This magnificent line of Railway has its present termini at Detroit in the State of Michigan, in the West, and at Portland, in the State of Maine, on the shores of the Atlantic, in the East, and extends over eleven hundred miles, through regions unexcelled for productiveness and fertility of soil, general salubrity, and agreeable variety of climate:

Grand Trunk Railway.

One of the most important events to Detroit, and the entire west that has transpired for many years is the completion of this great thoroughfare. The link from Port Huron to this city was opened for traffic on the 21st of November, since which time the business crowding upon it has fully equalled its capacity.

It possesses important advantages over any other road both for freight and passenger traffic. Being of uniform gauge, no change of cars will be necessary from Sarnia to Portland; and being also under the management of one corporation, it affords better facilities for the protection of passengers, and the preservation of their baggage than where they are required to pass over lines under the control of different, and perhaps conflicting corporations.

The harbor of Portland is one of the finest and most eligible in the world, and our immediate connection with a point of such importance is of itself a matter deserving particular mention. Portland district, as appears by the official statement of the tonnage of the United States, made in June, 1859, then owned 115,098 tons of shipping, being the ninth port in the Un-

ion in point of tonnage. She is very largely interested in the West India trade, her annual imports of molasses exceeding those of any port in the United States. She offers, therefore, to the Western States, peculiar facilities for procuring at a cheap rate the products of the West Indies. The harbor is without any bar, and so easy of access that no pilots are required, and strangers, with the directions given in the American Coast Pilot, have brought their ships into it with safety. There are no port charges, harbor dues, or light-house fees, excepting the official custom house fees.

The Grand Trunk Railway is likely to become the avenue through which an immense tide of immigration will pour into Michigan. It will be a favorite route for immigrants.

This is therefore a matter likely to be of vast importance to our State, with a large share of her territory as yet an unbroken wild, offering tempting inducements to the hardy settler.

The completion of this stupendous bond of connection between the Eastern and Western States, Canada and Europe, will render markets available which were before difficult of access, and enable far distant countries to exchange their products at all seasons. The Grand Trunk may be called the first section of the Pacific Railroad, as it already communicates with the Mississippi through Michigan, Illinois and Wisconsin Railroads, and we expect to see the line completed from the Mississippi to California. It is not easy to form an estimate of the amount of traffic and intercourse that the 1,150 miles of Grand Trunk Railway will bring to Michigan and the neighboring States. A junction has been already formed with that model of western lines, the Michigan Central, by which freight and passengers reach Chicago and the numerous lines which diverge from that great commercial city. It is probable that another junction will be made with the Detroit and Milwaukee Railway by means of a branch from Port Huron to Owosso. In this case, there will be a direct line across Michigan, connecting with the Milwaukee Railroads by the ferry across the lake, and penetrating Iowa, Minnesota, Nebraska, and Oregon, by lines which have not yet been traced on the Railway Maps of the United States.

The officers of the main line are as follows:

President, Hon. John Ross.
 Managing Director, T. E. Blackwell.
 General Manager, Walter Shanly.
 Secretary, J. Elliott.
 Supt. Western Division, C. R. Christie.

Officers of the Detroit and Port Huron branch:

President, T. E. Blackwell.
 Secretary and Treasurer, J. J. Stevenson.
 General Manager, Walter Shanly.
 Superintendent, C. R. Christie.
 Cashier and Agent for G. T. R., J. D. Hayes.

Grand Rapids and Indiana Railroad.

This line has its termini at Fort Wayne, Indiana, and at the Straits of Machinac, in Michigan. 20 miles of the line will shortly be completed from Grand Rapids in the direction of Machinac, and the entire line will be prosecuted with vigor.

Michigan Southern & Northern Indiana.

OFFICERS OF THE BOARD.

President, Geo. Bliss, Springfield, Mass.
 Superintendent, John D. Campbell, Toledo, Ohio.
 Secretary, Geo. H. Ford, New York.
 Treasurer, Wm. Walcott, "
 Assistant Treasurer, Geo. H. Ford.
 Cashier, W. Savage, Toledo.
 Directors, Geo. Bliss, William Walcott, Edwin C. Litchfield, J. H. Ransom, Hiram Sibley, John S. Prouty, E. Morrison, R. S. Burrows, C. N. Potter, John C. Wright, N. Beardsley, Wm. B. Wells, and R. Gardner.

This line of railway, which runs throughout its whole extent in Michigan, over a highly improved and very fertile border of the State, is 248 miles in length from Toledo to Chicago.

Its branch to Monroe from Adrian is 38 miles.

Its branch to Jackson from Adrian is 47 miles.

Its branch to Three Rivers, via White Pigeon, is 13 miles.

Its Air Line Division from Toledo to Elkhart, is 133 miles.

Detroit, Monroe and Toledo Division, 65 miles.

Making a total of five hundred and thirty-nine miles.

It is connected with Detroit by the branch called the Detroit, Monroe and Toledo Railroad, which has its office on the dock of the Detroit & Milwaukee R. R., foot of Brush street. The business of the D. M. & T. line is managed in Detroit by Mr. LEMUEL P. KNIGHT.

The compiler had expected a revision of the list of Directors and officers of the M. S. & N. I. R. R., and the usual orders for an advertisement, but up to going to press, the expected communication has not been received. (See Appendix.)

Street Railways in Detroit.

Railways are to be laid in four of the principal avenues of the city forthwith.—The indomitable energy of Captain E. B. Ward, R. N. Rice, General Superintendent of the Michigan Central Railroad, and other public spirited citizens is engaged in the movement, and affords ample assurance that the charter to build will be no dead letter in such hands. These lines are to run through Jefferson, Woodward, and Michigan avenues, and Fort street.

STAGE COACHES ply on all the Plank Roads leading to Detroit. Information is usually obtainable at all the Hotels.

We should be glad to hear betimes from those stage coach proprietors. The public no doubt would value detailed advertisements as to time and place as worthy to be appreciated. The Directory supplies information as much as possible without pay.

Steam Ferry Boats.

The *Union*, plys between Detroit and Windsor, Canada, leaving the dock at foot of Third street.

The Windsor leaves the Detroit & Mil-

waukee R. R. dock, foot of Brush st., on the arrival and departure of trains.

Several other steam ferry boats ply to and from the dock foot of Woodward ave., and the Canadian Dock, Windsor.

Detroit Steamboats Generally.

Several lines of steamers connect from Detroit with the Upper Peninsula, as well as with Toledo, Malden, Amherstburgh, Chatham, Cleveland, Erie, Buffalo, and the Merchant Marine of Detroit crosses the Atlantic with freights for English and other trans-atlantic ports. But as this department embraces such a large number of vessels, and as no information here set down could nearly compensate the neglect of personal inquiry of Capt. Hall, office near foot of Cass street, we prefer to introduce the maritime inquirer to the Admiral of the Port, except where lines are advertised in the Directory, as in the case of JOHN HUTCHINGS & COMPANY, Dock west of Griswold street.

Steamboat Lines of Detroit.

We present, for convenient reference, a directory of our various steamboat lines, including names of officers and agents, so far as they have been made known.

The boats as a general thing present a fine appearance, reflecting great credit upon the proprietors. Probably more money has been expended for painting and repairs than in any previous season. For this service, the Publisher modestly asks that each captain, mate, engineer and deck-hand purchase a copy of the Directory, to beguile leisure hours.

Annual Report of the Controller of the City of Detroit.

CITY CONTROLLER'S OFFICE,
Detroit, April 24, 1860. }

To the Hon. the Common Council:

Gentlemen—In obedience to the requirements of the charter I have the honor herewith to submit full detailed statements of the financial operations of the city government for the fiscal year ending on the 31st March last.

The total liabilities of the city as shown in detailed statement are \$318,195 12
The resources of the sinking fund now applicable to the redemption of the public debt are 11,123 05

Amount unprovided for at date..... \$307,072 07
The capital of the sinking fund is now \$78 865 55, the interest on which, and the annual tax of \$5,000 required by the provisions of the charter, will provide for the redemption of the funded liabilities of the city—except the public building stocks issued December 31st, 1859, for the construction of the

House of Correction, and it is believed that this institution, under efficient and economical management, will provide for its own maintenance and the redemption of the bonds issued for its construction at maturity.

The receipts into the treasury from all sources during the past fiscal year have been \$314,270 14
Balance of cash, April 1st, 1859 50,394 83

Total..... \$364,664 97
Disbursements for the same period :
For redemption bonds \$69,000 00
For Board of Education 40,666 93
For interest 19,849 92
For special assessments 37,732 14
For sewers 85,724 83
For road district improvements 18,912 25
For fire department, city poor, street lamps, and general purposes 81,549 92

Cash balance April 1st, 1860 \$294,435 99

Of which \$60,000 is applicable to the construction of the proposed House of Correction, and to the purposes of the several funds to which the same is credited in the table of ledger balances, the sum of..... 20,228 98

It is estimated that additional collections from the tax of 1859 will amount to..... 30,000 00

Making a total of \$50,228 98 applicable to the general purposes of the city from taxes already levied.

Credits to the several funds have been made to the full amount of the appropriations except to the Board of Education, general sewer, and general funds, which funds cannot be credited with their respective proportions of the tax until the return of the rolls by the Collectors; but it is hoped that a sufficient amount will be realized to meet the amount of unpaid claims, and the balances against the three funds last above mentioned. Though it is quite certain that the amount of delinquent taxes upon the rolls of 1859 will considerably exceed that upon the rolls of former years. This increase may be attributed to the removal of property and persons assessed from the district, and the resort to legal proceedings to avoid the payment of the tax, both of which are contingencies that cannot be foreseen or wholly prevented, but the extent of the evil may be lessened by great care in the assessment and promptness in the collection of the tax.

The assessment and collection of taxes is at all times a delicate and important duty, and the system should be such as will combine accuracy and economy. The annual expense of the present system, exclusive of advertising delinquent taxes, may be stated as follows:

Salary of Assessor \$2,000 00
Books, stationery, making State and county tax rolls and assistance 2,200 00
Fees of Ward Collectors 4,000 00

\$8,200 00

A sum equal to 4 per cent. upon the whole amount of tax levied.

I respectfully suggest such a modification of the present system as will, when completed, place the rolls in the hands of a receiver of taxes where for a definite period taxes may be paid without the addition of commission; that thereafter for a period of thirty days payments may be made with the addition of one per cent., and for each subsequent thirty days one per cent. be added until the 1st day of January in each year, when the books should be closed and all property upon which taxes still remain unpaid, advertised and sold as at present provided, in the case of delinquent taxes.

The advantages anticipated by this system are,

greater accuracy in the accounts, certainty as to time of payment, economy in the collection, and the receipt into the city treasury of the commissions paid, the benefits of which would accrue to all of the tax payers alike.

Much inconvenience has resulted to contractors from the uncertainty of collections under the system of special assessments for local improvements; and it is essential to the economical prosecution of works of this character, that greater certainty and efficiency be given to the system. The most immediate and apparent remedy is the exercise of great care in ordering this class of improvements, and a rigid enforcement of the regulations applicable to the preparation and collection of assessments.

An examination of the statements herewith submitted exhibits the gratifying fact that all demands upon the several funds dependent upon the general tax have been promptly paid, and that, with the exception of the city pound and road district funds, there is a sufficient balance to the credit of the respective funds to meet every demand which may be properly made upon them prior to the receipt of the tax of 1860. The expenditure for city pounds has been:

For salary of keepers.....	\$1,004 00
Disbursements.....	564 02
	<u>\$1,568 02</u>
Receipts for fees.....	504 44

Cost of maintenance.....\$1,068 58
This expense is incurred to remedy the inconvenience occasioned by violations of the city ordinances, and should be borne by parties who fail to comply with the law, and not be considered as a tax upon the general treasury.

The road district funds amount to about \$30,000 annually, and are without that efficient and practical supervision which is exercised over other funds, and which the magnitude of the appropriation and the importance of the work demand. The whole amount of the unpaid claims on the books of this department is chargeable to these funds, and such has been the case to a great extent in former years.

The sum raised in the respective districts should be sufficient for the purpose to which it is appropriated, but its expenditure should be brought within the immediate supervision of the Common Council, and limited in each instance by the amount of the appropriation.

The amount received for licenses during the past year is merely nominal, and calls for an inquiry as to the sufficiency of the law and the extent to which it has been enforced.

Your attention is particularly invited to the detailed statement of expenditures from the several funds, as the only criterion by which the propriety and necessity of the disbursements may be properly ascertained; and as forming the only safe basis upon which to predicate either new and increased expenditures, or necessary and substantial reforms.

The moderate advances which Detroit is by many supposed to have made during the past few years, are more than compensated by the substantial character of its progress; its firmly established credit, and the low rate of taxation necessary to its onward movement, as compared with that of western cities of equal importance and population.

Prudence would dictate that a policy productive of so satisfactory results should be adhered to with reasonable tenacity, but should not be permitted to deter us from entering upon and prosecuting with vigorous zeal such necessary and substantial improvements as may be accomplished without increasing the burthens of taxation, as will promote the health or convenience of our citizens.

Respectfully submitted,

J. M. EDMUNDS, Controller.

Annual Assessment Report of the Secretary of the Water Works.

OFFICE OF WATER WORKS, }
 DETROIT, July 10, 1860. }

To the Board of Water Commissioners of the city of Detroit:

GENTLEMEN—The annual assessments of the rates to be charged for water for the year commencing July 1, 1860, have been made, and a recapitulation of the same, together with statistical facts collected while canvassing the city, are herewith respectfully submitted.

The aggregate amount of the rates assessed is \$56,969—being an increase of \$1,063 over last year; of \$20,785 in the last five years; and of \$37,213 in the past eight years, or since the works were placed under the management of the Board. The number

Ledger Balances April 1, 1860. DR.
 New law public building fund \$50,000 00

of families now supplied with water from the works is 6,960—being an increase over last year of 156 families, and an increase within the past five years of 1,668 families. The whole number of families in the city not supplied with water from the works is 2,033, most of whom reside in districts not accessible to the distribution pipes at present laid. Some of them obtain their supply directly from the river, but most of them obtain it from wells, generally but scantily supplied by surface drainage. There is not within the limits of the city what can really be termed a spring, for the surface of the earth is underlain by stiff impermeable clay, extending down to a rock base. Of the water found in these wells, Prof. Douglass, who analyzed it, says: "The large quantity of sodium (common salt), chloride of potassium, and magnesium found in it clearly indicates its surface origin. The two last salts are cathartic in their properties, and the habitual use of water holding them in solution, is any considerable quantities, must prove injurious to health." A gallon of the well water he found to contain 116 grains of solid matter, while the water from the works he found to contain but a fraction more than five grains, "composed mostly of silica, alumina, and iron, elements that could produce little or no injury; while the much the most injurious compounds, are entirely absent." Nearly all who procure water from these wells, as also those who are now compelled to procure it directly from the margin of the river, subject as it is to the shore washings and drainage of a populous city, would gladly procure it from the works now, and will do so whenever distributing pipes are extended accessible to their premises.

Now that the construction of the works is nearly completed,—I mean as to the power to supply and capacity of storage of water,—which are constructed on a scale sufficient for at least three times the present population of the city, I deem it proper to call your attention to the necessities for the extension of distributing pipes, as the only means upon which you have to rely to make the works self-sustaining, as fast as you may be satisfied it will be remunerative and your means will permit.

The extension of water pipes has not, for the past few years, been commensurate with the growth of the city. This could not be done for the want of power to supply and capacity of storage of water. While there are 1,668 more families supplied with water from the works than there were five years ago, there are 977 more families in the city not supplied from the works than they were at that time. There were about 900 families added in 1857 by the extension of the geographical limits of the city, and the number has increased within these limits since that time about 500. The growth of the city by territorial extension merely, is not, however, that "growth" which results from the combination of capital and industry by which wealth and production is actually increased and geographical limits enlarged by necessary distension, but, on the contrary, imposes municipal burthens for its maintenance, of which the water works are necessarily obliged to contribute its proportion of unremunerative expenses, in laying long lines of pipes for few water-takers, instead of short lines for many consumers.

A very large number of families reside in districts too sparsely settled and too remote from the water pipes to justify the expectation of supplying them from the work at present, but there are now several localities within the city limits, some of them central and in close proximity to pipes now laid, where the population is nearly as dense as it probably ever will be, where the inhabitants are entirely destitute of wholesome water, where it would be remunerative to the works and salutary in its effects to extend the pipes. At first, it may be that all would not take water, but a sufficient number would to pay a fair per centage on the cost, and eventually all would be compelled to, as past experience in similar localities fully demonstrates, when the amount received from rates would be largely remunerative on the investment. In some

of these localities the inhabitants procure a partial supply of water from the works now, by trespassing on the nearest premises supplied, while but little if any revenue is derived therefrom. By extending pipes into these districts they would be compelled to connect service-pipes with their respective premises and pay the rates assessed, for they would no longer have any apology for doing otherwise.

The annual current expenses were greatly augmented while the work of construction was going on, but now that the works are about completed, and the current expenses hereafter will be confined to supplying water and maintaining the works, they should be proportionately lessened.

A large amount of the cost of construction and annual current expenses are properly chargeable to other branches of the municipal government—Fire Department and poor Funds—the burden of which should not be borne by the water takers, but by the city at large, for a large amount of property to which fire protection is afforded does not contribute to the revenue of the works, and it will be conceded that the poor should be thus maintained. It is true that about fifty thousand dollars' valuation of the old works will remain, the interest upon which is paid by the city, but this is not by any means equal to the proportionate cost of the works and annual cost of supplying water, which is now paid exclusively by water-takers. In my assessment report for 1857, I stated that the interest on the cost of what would remain of the old works would defray the expense of supplying the water to the Fire Department, but that had no reference to the cost of the works.

Besides the proportionate cost of the power to furnish a supply of water, there has been paid for fire hydrants and iron pipes to connect them and the reservoirs about forty thousand dollars, and, besides the proportionate cost of supplying water, one man is kept constantly employed examining and keeping the hydrants in working order. Whenever a hydrant or gate is broken, it is repaired or replaced at the expense of the works, thus increasing the current expenses about six hundred dollars annually. The annual amount which is now paid by water-takers, and which should properly be paid by the city, besides the proportionate amount for the cost of the power to supply, and supply of water, is as follows:

For annual interest on \$40,000-----	\$2,500
For annual expense of keeping hydrants,	
&c., in order -----	600
For annual expense of supplying the poor	
with water -----	1,000

Total-----\$4,400

To which should be added the proportionate amount of the interest on the cost of the power to supply, and for the supply of water furnished for fire purposes.

The whole number of families in the city is 8,978, being an increase over last year of 206 families.—Since the works were placed under the management of the Board, eight years ago, besides relaying 19 miles of distribution pipes, 29½ miles of water pipes have been added. The total pipeage in the city January 1 last was 61 miles and 535 feet. 3,285 more families are supplied with water from the works, and the annual amount of the assessed rates has increased \$31,585.

The number of unoccupied buildings in the city at the time the canvass was made was as follows: 68 dwellings, 34 stores, and 3 taverns, many of which were vacated for the purpose of being repaired.—The number of buildings constructing at the same time were as follows: 75 brick and 101 wooden dwellings—176 dwellings, 59 brick stores, 8 brick and 1 stone churches—4 churches, 2 brick public school houses, 2 brick mechanic shops, 3 brick additions to taverns, 1 brick house of correction, 1 public market, and 1 brick tannery; the aggregate cost of which is \$500,000.

The Marbleized Stone is a beautiful imitation of the most rare and desirable Foreign Marbles, such as Black and Gold Brocatelle, Porphyry, Agate, Verd Antique, Lisbon, Sienna Jasper, Serpentine, Brown and Green Pyrenees.

The imitations are so perfect, that they challenge the closest scrutiny. In style and finish they stand unrivalled. They are so highly polished, that they retain their beauty much longer than marble, and are not injured by smoke, coal, gas or stains.

Indeed, the confidence with which they have thus far been received, gives the fairest evidence that this marble will, by its many advantages, supercede all others.

NOTE.—We are entirely of opinion, that if there was a spark of true patriotism and com-
munitive good sense, and business shrewdness amongst us, we would determine on the de-
velopment of our own Iron Resources, and give up importing. In mercy to England her
mining operations should be economised—the island is honeycombed throughout, and it will
be well if she have enough ores yet remaining to supply her own great national demand. This
is not our business, however, but, it is, that we manufacture our own raw material of every
kind, particularly Iron, Wool and Cotton, and that we encourage the production of raw silk, of
which our women wear such large quantities woven abroad. Let us keep our money in
America.—EDITOR DETROIT DIRECTORY.

**BININGER'S
OLD LONDON DOCK**

GIN

Is evidently the product of very careful distillation—the active principle, the Juniper Berry—being so blended as to give to the spirit a very delicate, fruity and aromatic flavor.

COLTON SALTER, M.D.,
8 West 89th St. N. Y.

GIN AS A REMEDIAL AGENT.

This Delicious Tonic Stimulant, especially designed for the use of the *Medical Profession* and the *Family*, having superceded the so-called "Gins," "Aromatic," "Cordial," "Medicated," "Schnapps," etc., is now endorsed by all of the prominent physicians, chemists and connoisseurs, as possessing all of those *intrinsic* medicinal qualities—tonic and diuretic—which belong to an **old and pure Gin**. Put up in quart bottles and sold by all druggists, grocers, etc.

[Established in 1778.]

A. M. BININGER & Co.,
Sole Proprietors,
No. 19 Broad Street, N. Y.

"This Superb GIN [Bininger's Old London Dock] has attained a reputation without precedent in the history of the age."—*N. Y. Eve. Express.*

"The house of A. M. Bininger & Co., 19 Broad Street, has attained for a period of EIGHTY YEARS a reputation that may be envied."—*N. Y. Eve. Post.*

The infamous practice of adulterating Brandies having become so common that a genuine article is the exception; it is of *vital importance* to those requiring it for Family use and Invalids, that it should be of undoubted purity and efficacy.

With a view to meeting the popular demand for a reliable Brandy in its natural state, free from alcoholic flavor and impurities, and fully appreciating the fact that it is often recommended by the Medical Faculty, as a *sustaining stimulant*, when all other remedies fail, we are now bottling and selling at reasonable rates, a Brandy of our own importation, from one of the most responsible houses in France, and known as

"Bininger's Genuine Cognac Brandy."

It is mild, delicate and fruity, and is designed to be always uniform in quality and character. Put up in pint and quart bottles, in cases containing two dozen pints and one dozen quarts, and is sold by all prominent druggists, grocers and town agents.

The above is also for sale in original packages, viz.: Eighth and Quarter Cases.

A. M. BININGER & Co.
[Established 1778.]
Sole Importers, No. 19 Broad St., N. Y.

The *established popularity* of this CHOICE OLD BOURBON as a medicinal agent, renders it superfluous to mention in detail the characteristics which distinguish it from the ordinary grade of Kentucky Whiskeys.

Being distilled in 1848, and manufactured expressly for us with great care, it can be relied upon as a *strictly pure* stimulant, and peculiarly effective for the treatment of Lung Complaints, Dyspepsia, Derangement of the Stomach, Nervousness, etc.

As a curative agent it has a tendency to *recreate and strengthen*; while age having contributed its genial charm and enriched it with a delicious flavor and an oily body, it affords a pleasant incentive to the preservation or recovery of health, through the agreeable medium of a well pleased palate.

Put up in a variety of attractive forms, in iron-bound cases of one and two dozen bottles each, and sold by all prominent druggists, grocers and town agents.

A. M. BININGER & Co.,
[Established 1778.]
Sole Proprietors, No. 19 Broad St., N. Y.

LEB The above popular goods are sold by all of the prominent Druggists and Grocers in Detroit.

SINGER'S SEWING MACHINES.

W. R. A. Woodruff, Agent, 58 Woodward Ave., Det.

THE SINGER SEWING MACHINES.

The marked and ever extending popularity of SINGER'S SEWING MACHINES, both in America and Europe, is such as best to establish their superiority over all others in the market. Sewing machines—so called—may be bought, it is true, for a smaller amount of dollars, but it is mistaken economy to invest anything in a worthless or unreliable article, and those who do so must abide the consequences.

SINGER'S NEW FAMILY MACHINES.

In order to place the BEST FAMILY MACHINES IN THE WORLD within the reach of all, we have reduced our LETTER B, OR TRANSVERSE SHUTTLE MACHINES to \$50.

SINGER'S No. 1 AND 2 STANDARD SHUTTLE MACHINES, both of very general application and capacity, and popular both in the family and manufactory. Prices reduced, respectively from \$135 and \$150 to \$90 and \$100.

SINGER'S No. 3 STANDARD SHUTTLE MACHINE, for carriage makers and heavy leather work. Price, complete, \$125. Also, to complete the list,

AN ENTIRELY NEW ARTICLE,

unequaled for manufacturing purposes; NOISELESS, RAPID, and capable of every kind of work! Price, including iron stand and drawers, \$110, cheaper at that in view of its value, than the machines of any other maker as a gift.

All of Singer's Machines make the Interlocked Stitch, which is the best stitch known. Every person desiring to procure full and reliable information about Sewing Machines, their sizes, prices, working capacity, and the best method of purchasing, can obtain it by sending for a copy of *L. M. Singer & Co.'s Gazette*, which is a beautiful pictorial paper entirely devoted to the subject. It will be supplied gratis.

AN INVENTION FOR THROWING WATER BY HAND-POWER,

THE MOST EFFICIENT FIRE ENGINE IN THE WORLD,

Because the Most Available.

The Hydropult weighs but eight pounds, and will, by the power of one man, throw water at the rate of eight gallons per minute, fifty feet high. It is a most desirable article for use

IN EVERY HOUSEHOLD,

FOR WASHING WINDOWS, WETTING SIDEWALKS, SPRINKLING STREETS, WASHING CARRIAGES, WATERING GARDENS, SPRINKLING PLANTS, &c., and in case of FIRE IT IS INVALUABLE.

Many conflagrations have been prevented by the use of this simple instrument. It has received the endorsement of the *entire* FIRE DEPARTMENT OF NEW YORK CITY AND BROOKLYN, including the CHIEF ENGINEERS, ASSISTANT ENGINEERS and FIRE MARSHALS; also the recommendation of *all* the principal

FIRE INSURANCE COMPANIES OF NEW YORK CITY.

Two hundred and fifty thousand dollars of property was saved from destruction by the use of the Hydropult *alone* at the Palace Garden on the night of the 5th of October, 1860.

For particulars see certificate in circular from the Secretary of the American Institute; also New York daily papers of the 6th and 9th October, 1860.

The Hydropult should be owned by every householder. It does away with the necessity of a hydrant. It is a light, portable FORCE PUMP, always ready, easily used, and will come in frequent use by every farmer, merchant, and mechanic in the community. Please call and examine the article as No. 151 Nassau St., Times Building, or address the

CLINTON WIRE CLOTH CO,

MANUFACTURERS OF

POWER LOOM WIRE CLOTH

OF ALL WIDTHS, GRADES AND MESHES,

BRASS, IRON AND COPPER.

These Cloths are made by Power Looms and other improved machinery, and are superior to anything heretofore made, from the fact, that the bending of the warp and filling threads over and under each other, is equally divided, thus producing an article that cannot be changed in grade.

FOR THRESHING MACHINES

Fan Mills and all Grain Assorters,

Also for all RIDDLES, as well as

LOCOMOTIVE SPARK ARRESTERS,

The use of this quality is invaluable.

All orders filled immediately, and contracts made with large consumers and the Trade, on such terms that they will find it for their interest to take their supply of us.

N. B.—Our Trade Mark: "Power Loom Wire Cloth."

Clinton, Mass.

Supplies of this excellent fuel can now be had at the Coal Depot, on Atwater Street, Detroit and Milwaukee Railroad, foot of St. Antoine street.

Price \$3.25 per Ton.

Orders left on the slate in the Coal Office, or with any of Hendrie & Co.'s teamsters, will be promptly attended to.

Detroit, January 11, 1861.

J. J. BRISCOE, Agent.

GIFFARD'S BOILER INJECTOR.

JACKSON & WILEY, FOUNDERS & MACHINISTS

Corner of Fifth and Woodbridge Sts., Detroit, Michigan,

SOLE AGENTS FOR MICHIGAN.

WE RESPECTFULLY CALL THE ATTENTION OF

All who Use Steam in any Way,

To this valuable instrument, which is destined to

SUPLANT FEED PUMPS OF ALL DESCRIPTIONS.

The Advantages to be Derived from this Apparatus are:

1st. The saving of the first cost of all Pumps, and the parts to connect them with the Engine and Boiler.

2d. The wear and tear of these Pumps.

3d. The saving of the power required to work Pumps, of whatever construction.

4th. The elevation of the temperature of the water admitted into the Boiler by steam used, thus preventing any appreciable loss of heat.

5th. The advantage of being able to supply water to Boilers without setting the Engine or other Machinery in motion, thus in all cases obviating the necessity of donkey pumping engines and affording all the advantages usually sought in their application.

6th. AVOIDING ALL RISK OF FREEZING, as while at work, the steam is constantly passing through the instrument, and when shut off from working, the water immediately leaves the Injector, which remains perfectly dry till put in operation again.

7th. NO VALVES to get out of order, because there are none used.

8th. It occupies small space, and can be attached at any part of the Boiler wherever most convenient.

9th. Any ordinary fireman can learn the method of working the Injector in a few minutes.

We cordially invite all who desire to witness the operation of the Injector, to

COME AND SEE THE ONE IN OPERATION AT OUR WORKS,

Which has enabled us to throw out our Feed Pump, and the working of which gives the most entire satisfaction.

WE SHALL BE HAPPY TO SEND CIRCULARS

Upon application for them, containing

CUTS OF THE INJECTOR,

And the method of attachment to Boilers, and other information.

JACKSON & WILEY.

THE TRIBUNE FOR 1861.

PROSPECTUS.

THE WEEKLY TRIBUNE is now in its XXth Volume. During the past year THE TRIBUNE has been obliged to devote quite a large proportion of its space to Politics, but we shall henceforth be able to limit our space devoted to Political discussion, and devote most of our columns to subjects of less intense but more abiding interest.—Among these we mean to pay especial attention to

I. EDUCATION—The whole subject of Education, both popular and general, will be discussed in our columns throughout the year 1861, and we hope to enlist in that discussion some of the profoundest thinkers and ablest instructors in our country. It is at once our hope and our resolve that the cause of Education shall receive an impetus from the exertions of THE TRIBUNE in its behalf during the year 1861.

II. AGRICULTURE.—We have been compelled to restrict our elucidations of this great interest throughout 1860, and shall endeavor to atone therefore in 1861. Whatever discovery, deduction, demonstration, is calculated to render the reward of labor devoted to cultivation more ample or more certain, shall receive prompt and full attention.

III. MANUFACTURES, &c.—We hail

every invention or enterprise whereby American Capital and Labor are attracted to, and advantageously employed in any department of Manufacturing or Mechanical Industry as a real contribution to the Public weal, insuring ampler, steadier, more convenient, more remunerating markets to the Farmer, with fuller employment and better wages to the laborer. The progress of mining, Iron-making, Steel-making, Cloth-weaving, &c, &c, in our country and the world, shall be watched and reported by us with an earnest and active sympathy.

IV. FOREIGN AFFAIRS.—We employ the best correspondents in London, Paris, Turin, Berlin, and other European capitals, to transmit us early and accurate advices of the great changes there silently but certainly preparing. In spite of the pressure of Domestic Politics, our News from the Old world is now varied and ample; but we shall have to render it more perfect during the eventful year just before us.

V. HOME NEWS.—We employ regular paid correspondents in California, at the Isthmus of Darien, in the Rocky Mountain Gold Region, and wherever else they seem requisite. From the more accessible portions of our own country, we derive our information mainly from the multifarious correspondents of the Associated Press, from our exchanges, and the occasional letters of intelligent friends. We aim to print the cheapest general newspaper, with the fullest and most authentic summary of useful intelligence that is any where afforded. Hoping to "make each day a article on the last," and print a better and better paper from year to year, as our means are enlarged through the generous co-operation of our many well wishers, we solicit and shall labor to deserve a continuance of public favor.

LANDS FOR NOTHING!

THE NORTH OUTGROWS THE SOUTH!

But why should it? Here are very cogent reasons: Industrious, free born, noble hearted white men, whether born in America, or immigrating from Europe, will not settle in Slave States, to endure the demoralization of mixing in neighborhood with the barbarism of negro servile labor: but the majority of whom would prefer to possess homes in the sunny South everywhere North of the Southern boundary of North Carolina to the Pacific Ocean, but for the existence of slave labor, and its incompatible contrast with the individual industry and free civilization of the Caucasian Race.

The following facts are recommended to Secessionists in preference to the MISSOURI-COMPTONEN, or any other Compromise Boundary Line whatever:

The total number of holders of one slave was.....	65,820
The total number of holders of one and under five.....	268,695
The total number of holders of five and under ten.....	58,795
The total number of holders of ten and under twenty.....	54,885
The total number of holders of twenty and under fifty.....	28,733
The total number of holders of fifty and under one hundred.....	6,194
The total number of holders of one hundred and under two hundred.....	1,479
The total number of holders of two hundred and under three hundred.....	187
The total number of holders of three hundred and under five hundred.....	56
The total number of holders of five hundred and under one thousand.....	9
The total number of holders of one thousand and over.....	3

Total number of slaveholders, male and female, in the United States..... 367,525

From which it would seem one-fifth of the properties were in a single slave, and nearly one half in less than five slaves. Suppose we allow, on an average, five children to each slave holder. There were then of slaveholders and their children 1,787,025 to be deducted from the white population above mentioned, leaving 4,484,798 whites in the slave states, who were not owners of slaves, and of course not interested in slave property, but who are subdued to a condition of poverty and inferiority (in an avowedly free, enlightened and Republican country), in consequence of a few negro breeding capitalists desiring to make large sums of money out of the employment of a few thousands or millions of black men doomed to endless servile labor. Happy will be the day for the so-called slave states when they offer to every free white emigrant 160 acres of land as a reward for his settlement upon the soil in a condition of perfect freedom from all interference!

Slave labor is a baneful impediment to the white man's Southern settlement and wealth producing progress.

Black men are not permitted any ambition even did they have any inherently. They are either primordially, or by hereditary destiny doomed to inferior positions in these United States! Equip those who are free, and send them as harbingers of civilization to Africa! Even if every slave were removed from America to-morrow, the whole Union would be blessed, and no part of it more than the Southern States themselves. The slavery of the black man tends to enslave the white man, and begins amongst the owners and dealers in slaves an idle, demoralized kind of employing, NONDESORIPT ARISTOCRACY, but who are literally themselves the mere stewards and servants of English and French cotton mill owners, and dealers in pigtail tobacco.

Every man's labor is worth his wages! The standard daily pay of agricultural laborers should be not less than \$1, and workmen should faithfully labor for their employers at that figure. The South so called, north of the Southern boundary of North Carolina particularly, presents a much more inviting region for settlement to the white man than latitudes north of the 36th parallel. States within these lines would increase in wealth and population full fifty per cent in a decade, were they forthwith to empty out their territories of every slave, no matter at what depreciation of prices to the Gulf States, where, from the increase of their numbers and more suitable fields for labor, they might be profitably employed—only as an irretrievable endurance of an universally admitted evil.

European, Eastern and Northwestern American emigrants would rapidly pour into Delaware, Maryland, Virginia, North Carolina, Kentucky, Northern Alabama (which ought to be a separate State), Tennessee, and through the whole West within those parallels. Such white emigration will not otherwise take place, no matter how great may be the inducements of climate, dissensions in the confederacy would be for ever removed, and our great and beloved Republic would be lasting as the mountains, confirmed in strength and unity.

An individual in Detroit invites one hundred families of industrious and moral habits, with such means as they may gather together, to confederate and move in the ensuing fall to CALIFORNIA or OREGON, where the most productive lands are to be obtained from the Government, and where the climate is unsurpassed for delight and salubrity. The cities of the Union are perniciouly crowded with thousands of unproductive families, who need only guidance and good advice, and who would acquire the happiest personal independence, and increase the wealth of the State and the Union by their Settlement on any of the farming lands of the Union, either North, South, East or West, but particularly Southwest.

I shall gladly communicate any information I may obtain to any enquirer, and shall not cease to interest myself, and all parties who may be concerned, and entertain a hope that Congress will encourage by grants of land all colonies of this character. In this connection I request reference to the advertisement of Messrs Geo. H. WILSON & Co., to be found on page 248 of this Directory.

James Dale Johnston.

THE
HYDROPULT

\$140,000,000 Lost by Fire in Seven Years.

On the recommendation of Mr. Chief Engineer Decker, of the New York Fire Department, the Public Buildings of the city are all being furnished with this portable and indispensable **HAND ENGINE**. The Board of Education in New York are also supplying the Common School Buildings. Such precaution against possible fire is worthy of imitation in Detroit. Too late to

lock the stable door when the horse is stolen! Too late to put on a life preserver when one is drowned! Too late to buy a **HYDROPULT** when the house is burned, or the fire may have taken a destructive headway before an engine arrives to complete the destruction by inundating your house and furniture, &c., in order to save the next building from fire! The **Hydropult** should be in every dwelling, office and other building. It throws water 50 feet effectively. Friend Button, send on one to the subscriber's address. The two I purchased from you I was obliged to sell immediately on receiving them at the Express office, to Theo. H. Hinchman and Oliver Bourke, merchants on Jefferson avenue, and old members of our Detroit Fire Brigade, and who are well pleased with their machines. Hinchman paid his \$12 in par funds cheerfully. The machine is excellent for sprinkling walks, gardens, washing windows, &c &c.

Apply to **American Hydropult Co.**, 151 Nassau St and 41 Park Row, New York.

JAMES DALE JOHNSTON.

P. S.—I should be willing to sell in exchange for "PULTS," \$1500 paid on City Lot contracts—just for a turn in trade. The property will rise 75 or 100 per cent in 8 or 10 years.
See Advertisement on page 106.

TO THE LADIES!

An advertisement Free of Charge, but better than a present of a large sum of money to every housekeeper and every young woman intending to own a husband and children:

ADVICE.

No young woman should marry until she knows how to make good bread; and should be early taught to understand her wifely responsibilities in keeping house.

BREAD MAKING.

One of the best bakers gives the following receipt to make superior bread:

"Take three-quarters of a pound of well-boiled mealy potatoes, and mash them through a fine cullender or coarse sieve, add about two tablespoonfuls of yeast, and one pint and three-quarters of lukewarm water, together with about three-quarters of a pound of flour, to render the mixture the consistence of thin batter; this mixture should be set aside to ferment; if placed in a warm situation it will rise in less than two hours, when it will resemble yeast in appearance, except as to color. The sponge so made is then to be mixed with one pint of water, nearly blood warm, and poured into half a peck of flour, which has previously had one ounce and a quarter of salt mixed in it. The whole should then be kneaded into dough, and allowed to rise in a warm place for two hours, when it should be made into loaves and baked.

"The object of adding the mashed potatoes is to increase the amount of fermentation in the sponge, which it does to a very remarkable degree, and, consequently, renders the bread lighter and better." A few caraway seeds scattered in are said to be quite agreeable in the bread.

J. B. HANNIMAN'S SAUSAGE WORKS!

Corner of Fort and Beaubien Sts,
DETROIT, - - MICHIGAN.

ABOUT TWENTY
Different Kinds of Sausages,

CONSTANTLY ON HAND.

Ours are the most inviting meats in the market of Detroit. The Subscriber has been educated to his business, and an Exhibition of his Preserved Meats and Sausages obtained Diplomas at the Michigan State Fair in the Fall of 1859. His Boned and Preserved Pigs' Heads are splendid, and when served in good style at parties command admiration as well as stomachic appreciation. His Preserved Meats are just the requisite for Suppers, Pic-nic Parties, Hunting and Fishing Excursions, as well as for the breakfast "relish" in every family.

For Officers of the Five Lodges of Master Masons, organized in Detroit, and for other Masonic intelligence, see page 38 and following pages in this Directory. The Secretaries of Lodges would discharge a fraternal duty by forwarding to the address of an overtaken compiler the usual nominal lists of officers, and indeed the Lodges should pay for their insertion in a Record so useful as a Local General Directory.

Military.

[See page 46 of this Directory.]

Several of the companies reported on the Roster of our city volunteers, disbanded; some have re-organized, and different companies have incorporated.

We have been always of opinion that the State Laws should oblige every Township to organize a Military Company, and that every man of suitable capacity to bear arms, should be obliged to muster in his Township, in uniform, and with the weapons of his rank, for purposes of inspection and drill, without distinction, or regard whatever to his occupation or position in the commonwealth, except as a minister of religion, and only excused from review and drill on duly certified causes of inability to attend such inspection and drill, once in each quarter. The expenses of clothing, arms, and equipments should be borne by the Federal Government, and by the State conjointly. Each township should have its barracks for stores in charge of a store keeper, and be the point of concentration. It is sheer folly on the part of our State Governments to neglect to maintain an efficiently disciplined and effectually equipped militia in each and every State. We feel relieved in discharging this serious personal citizen duty on a subject matter involving probably the stability, certainly the national military influence of the Republic, whether as regards the domestic strength of State Governments, or the influence of the United States, in international relations with the World.

"MY VILLAGE HOME."

A SONG—BY PARK BENJAMIN.

Sweet village home! I love thee well,
 I love thy woods and flowers,
 The vineclad cot, the grassy dell,
 Fit haunts for summer hours;
 I love the wild and merry song
 Of brooklets as they foam;
 I love thee as I loved thee long,
 My happy village home.

Sweet village home! in other climes,
 In halls of power and pride,
 For thee and for thy quiet times,
 In lonely thought, I've sighed;
 Not all the mirth and revelry
 In pleasure's loftiest dome
 Could win my constant heart from thee,
 My happy village home.

Sweet village home! that day will bring
 No solace unto me,
 When I must fly on restless wing,
 Far, far away from thee,
 If she whose beauty makes thee fair
 Will not consent to roam
 From thy green fields and rosy air,
 My happy village home!

HOME COMFORT, PREMIUM SUMMER AND WINTER

Every intending Purchaser of a
FAMILY OR PARLOR STOVE.

Is invited to call before selecting at
NO. 201 JEFFERSON AVENUE.

COOKING STOVE,

LARGE VENTILATED OVEN. PATENTED 1860.

Manufactured and for Sale by JAMES MORRISON, Junr., 205 River Street, Troy, N. Y.

SOLD BY

CHARLES BUSCH,

201 Jefferson Ave., Kearsley's Block, Detroit.

A Circular with full instructions in relation to this great Hotel, Tavern and Family Cooking Stove, can be had of the exclusive dealer,

CHARLES BUSCH, GENERAL HARDWARE MERCHANT,

201 Jefferson Ave, Detroit, Mich.

We are of opinion that no Farmer's family should be without this Stove. It is positively worth its price in one season to have secured to the family Warm Water in the Reservoir, and Warm Pies in the Patent Conservatory; besides, the truly elegant pattern of the stove itself. Altogether, the design and its appreciable conveniences should justly supercede every known Cook Stove in existence.

EXCELSIOR!

Those persons in want of a good Sewing Machine, are respectfully invited to call and see,

THE ORIGINAL HOWE SEWING MACHINE

WHO INVENTED THE SEWING MACHINE?

E. HOWE, Junr., the Original Patentee and Inventor, 1845.

Keep this Fact in view when you purchase, that

A GOOD SEWING MACHINE!

Is an Article much to be Desired,
AN INFERIOR ONE IS A PEST, AND IS TO BE AVOIDED.

The utility and practicability of the

HOWE SEWING MACHINE

WAS ESTABLISHED IN 1845.

It is the Oldest Sewing Machine Patent extant.

Since the date of the HOWE PATENT, some 800 Patents on Sewing Machines have been granted, not one of which has surpassed the Howe invention. In fact, no Machine has yet been made which will sew a more perfect stitch or seam than the first HOWE MACHINES made in 1845.

For Family use, new Machines have recently been constructed. They should be examined by all persons about to purchase. The

FAMILY MACHINES!

Are well adapted for TAILORS, or GAITER FITTING, having sufficient power, and warranted to be durable. They are unquestionably the best machines for VEST MAKERS in the market.

PRICES, \$50, \$70, \$80, and \$100.

The genuine Howe Sewing Machines are adapted to all kinds of Sewing done by Sewing Machines. They are constructed under the direction of Mr. Howe himself, of the best materials, in the most thorough and substantial manner, by skillful and experienced workmen,

And in all instances are Warranted.

A critical examination is requested by those persons wishing to purchase Machines. An experienced operator will be at the room, to give all instruction in the use of the Machine, free of charge.

The purposes to which this useful and portable hand fire engine may be applied are so various that every Household should be possessed of one.—For full particulars see advertisement.

FARMER'S MAP OF MICHIGAN, AND OTHER STATES.

The best prepared map of Michigan ever published, is now in the market.—See Advertisement in Index. It contains all the new Counties, Salt Wells, Iron, Copper, and Coal Mines, complete Census of Counties from 1837 to 1860 inclusive. The map contains the whole of Michigan and Wisconsin and parts of three other States, Geological Statistics, Rail Road Lines, &c, and its style and finish cannot be surpassed.

GIFFARD'S BOILER INJECTOR—JACKSON & WILEY.

This remarkable and utilitarian invention may be seen in full operation on any day during work hours, at the cleanly, well ordered and extensive Foundry and Engine Works of Messrs Jackson & Wiley, corner of Fifth and Woodbridge streets. A visitor whose object is not mere idle curiosity will be obligingly shown through the several extensive departments of the establishment. Engravings of the Injector are industriously handed visitors by the engineer in charge. See advertisement at page 154, and the card of Jackson & Wiley, inside the back cover.

WILLIAM HENDERSON, MERCHANT TAILOR.

Reference is made to this gentleman's advertisement at page 169. Mr. Henderson, whether as a Tailor and Draper or a man, is one of Nature's own ennobling.

BUCHANAN & CARROL.

These eminent Boiler manufacturers are to be found at their old stand, Atwater Street, between Hastings and St. Antoine. See their card on page 172.

SHIRTS.

We are aware that D. T. Barrett has a very extensive Shirt Manufactory in operation, corner Jefferson avenue and Shelby street, but the compositor has mixed up his shirts *with other wares* in setting up the type of the advertisement of this house, to be found on page 186, and there being now no remedy to *alter the matter*, it is to be hoped that this *shiftless* excuse may not be rejected by our friend, restoring us again to terms of honorable reconciliation. The luckless and bootless printer has escaped our vengeance.

COMMERCIAL HALL, 123 Woodward Ave.

John W. Hodgkins' neatly set card is found on page 187.

THE WORKHOUSE.

This institution is now (April, 1861), in progress of completion. The following particulars are extracted from an article in the Detroit Tribune, as the result of a personal examination of the premises by Mr. JAMES F. COMOVER, one of the Editors. The Workhouse will be occupied almost immediately. The building which is the most complete in the city, covers one of the three acres allocated for the service of the institution. It is very commodious, well built, secure, and planned with a scientific adaptation to all its purposes. It is constructed of brick, with stone facings, the roof is covered with parti-colored slate, and is surmounted with an ornamented Cupola. The view of the building commands general admiration. The architect, Mr. Sheldon Smith, has given the Detroit public a full proof of his superior ability. The contractors and builders, in all the departments are said to have discharged their duties well. An article giving a full description of this extensive Public Building in *minutis* had been prepared for insertion in the Directory, but was not discovered to have been mislaid amongst a mass of manuscript copy, until too late to re-write it. It contained suggestions in regard to the necessity existing for the immediate erection of a BRIDG-WELL. The organization of a uniformed and municipal Peace Preserving Police, consisting of one Captain, two Lieutenants, one Head Constable, five Sergeants, and fifty Privates, with a division of the city into Police Districts, in which Station Houses should be erected. The appointment of a Bridewell keeper and Guard. And, contemplating the probability that the expansive area of Detroit with an anticipative population of 200,000 may be constituted within its own jurisdictional limits, a County of the City—suggested to the tax-payers of Wayne county, the erection of a County Gaol at Plymouth, in the cost of which the city of Detroit should not hesitate to participate. The Sheriff of a county, consulting the proprieties of his position, should be expected to reside where his personal convenience, and the public service would warrant, but he should not be degraded by imprisonment in a Gaol.

DETROIT HOUSE OF CORRECTION.

This public institution may be expected to be opened for boarders, and persons generally in search of a knowledge of the means of obtaining an honest livelihood in a short few months. It is to be hoped that the *morale* of its government may be creditable to Detroit, and prove a salutary blessing to society in general.

THE RUBICON.

This is the title of an extraordinary pamphlet, written by Mr. Elisha Chase of Detroit, from whom it is obtainable.

"AUNT SALLY."

This is a Duodecimo of about 216 pages, written by some lady in New York. It has been handed to us for an opinion. We think large editions would sell in England and Canada. It gives one a tolerably fair insight into the system and operations of slavery, which is now found to be the means of rending the federal compact and disintegrating our beloved republic. Happy for the moral industry and success of the *white democratic masses*, if every negro in the United States were exported to Africa. *Certain aristocratic white men must have slaves of some kind or another*, and if they cannot get "NEGROES," they will strategise to grow rich out of their white brother's labor. By and bye our Common School Boards, probably, may find it necessary to prevent the untrammelled progress of the children of humble parentage, *lest the labor market should fail*. We are inclined to think there is

a screw loose *Fine, and "refined society," demands fine hands. Kid gloves, money, and the elegancies of life generally, no matter whether the slave be white or black whose labor creates the means.* This is what intelligent Christian men and women who do hard work, and know all about it, would call a contemptible aristocracy. We hope we shall have *modest times* at the **WHITE HOUSE**.

H. & L. SIMONEAU, DRUGGISTS.

If the brain of a Directory compiler were made of adamant, an impression would be worn upon it by the many inquiries made personally to him for everybody and about everything in town. It is not enough that he gives his best attention to have every person's address correctly recorded, and that he emblazons and displays his friends' advertisements. Rushing in a hungry paroxysm to get dinner at Carson's saloon a few days ago, he was besieged by three or more rural gentlemen who evidently either formed the escort from the country of the new Collector of the Port, or else they were *after him* for an inspectorship—but who knew so little about Detroit they wanted to be piloted to Simoneau's Drug Store. We coolly informed them the card of Simoneau's Drug Store was on the inside front cover of the Directory. We suppose they wanted a sedative.

FURNACES, RANGES AND PARLOR GRATES.

Attention is directed to the card of John Holmes on page 201.

WATER OIL COMPANY.

RAIL ROAD HOTEL,

Formerly H. B. Andrews'. The excellent management of this popular public house by the Messrs Antidel is known already to the general traveling community. With courteous hosts and well provided tables, the Rail Road Hotel will always maintain its admitted excellent character. See card at page 204.

JAMES A. PERKINS & Co., 109 Jefferson Avenue.

Our esteemed friend, Thomas S. Sprague, Esq., is associated with Mr. Perkins in the importation of Wines, Brandies and other Liquors. We have heard Perkins say *he* would never be a party to the sale of bad and injurious liquors, and we have good hope in the early training of friend Sprague that his morals and experience will enable him to offer in the market only such pure liquors as the faculty recommend for medical purposes. See advertisement on page 226.

MICHIGAN IRON FOUNDRY AND MACHINE SHOP, corner Atwater and Rivard Sts.

This old establishment has yet at its head the Hon. William Barclay, with whom is associated in partnership his son William L. We request attention to the card of this extensive machine shop, to be found on page 227.

NEW YORK TRIBUNE.

See card page 241. We request friend Greely's *own* attention to this card, and would have him express his opinion of our *mindfulness* of rendering to Cæsar the things that are Cæsar's. We shall call accounts squared if he puts us on his list of permanent exchanges for the Daily, and otherwise remember us when we get into Court.

RANSOM GARDNER.

The card on page 242 is singularly attractive, and leaves us nothing to add.

FREE FARMS FOR THE INDUSTRIOUS OCCUPATION OF THEM.

G. H. White & Co, offer to 50 families 50 free farms, in Emmet County, in the beautiful State of Iowa. We shall be glad, at the request of this firm, to act as their agent here. See card page 248 and also 244; see also 257 and 260.

DETROIT VINEGAR WORKS.

Among the changes so constantly occurring in so large a city as Detroit—we noticed a new and extensive branch of industry established at No. 92 Jefferson avenue by Messrs. Oliphant and Haywood. We have examined, and fully satisfied ourselves that their vinegar is a superior article for pickling and table uses, Attention is requested to *advertisement, page 335*. Mr. Oliphant had been formerly known in the employment of F. Buhl & Co.

PHOTOGRAPHIC PICTURES.

See J. F. Raymond's card on page 275. We would here suggest to strangers and citizens who have not yet been there, that it is quite a treat of rational enjoyment to visit Mr. Raymond's Fine Art Gallery; at No. 205 and 207 Jefferson avenue.

William J. Spicer, Detroit and Milwaukee, depot foot of Brush Street, Detroit; see inside front cover.

"WHERE THERE'S A WILL, THERE'S A WAY."

BY J. G. SAXE.

He was a noble Roman,
In Rome's Imperial day,
Who heard a coward croaker,
Before the battle say:
"They're safe in such a fortress;
There is no way to shake it—"
"On! on!" exclaimed the hero,
"I'll find a way, or make it!"

Is fame your aspiration?
Her path is steep and high;
In vain he seeks the temple,
Content to gaze and sigh;
The peerless prize is waiting,
But he alone can take it,
Who says with Roman firmness,
"I'll find a way, or make it!"

Is Learning your ambition?
There is no royal road;
Alike the peer and peasant
Must climb to her abode;
Who feels the thirst for knowledge
In Hellcon may slake it,
If he has still the Roman will
To find a way, or make it!

Are Riches worth the getting?
They must be bravely sought;
With wishing and with fretting,
The boon cannot be bought;
To all the prize is open,
But only he can take it,
Who says with Roman courage,
"I'll find a way, or make it!"

In love's impassioned warfare,
The tale has ever been
That victory crowns the valiant;
The brave are they who win,
Though strong is beauty's castle
A lover still may take it,
Who says, with Roman daring,
"I'll find a way, or make it!"

The Latest Local Changes, and General Errata.

VERY ENCOURAGING.
